

# TECHNOLOGY AUDIT AND PRODUCTION RESERVES

№ 2/1(46), 2019

## CONTENTS

### MECHANICAL ENGINEERING TECHNOLOGY

- 4** Improvement of tank for gas transportation in compressed condition and comparative evaluation criteria  
**Dzhus A., Yurych A.**

### TECHNOLOGY AND SYSTEM OF POWER SUPPLY

- 9** Improvement of thermotechnical properties of refrigerator's evaporator using nanoparticles  
**Milowanov V., Balashov D.**

### REPORTS ON RESEARCH PROJECTS

- 15** Experimental studies of the grinding process by planetary grinding head  
**Kalinichenko N.**
- 18** Determination of the essential effect of modification in the composition of the combined vibration treatment technology on the mechanical properties of AK7 alloy  
**Selivorstov V., Dotsenko N., Dotsenko Y., Dotsenko V.**
- 21** Regulation of electrophysical properties of fireproof polymer compositions filled with hydromagnesite for cable products  
**Chulieieva O., Zolotaryov V.**
- 24** Analysis of the special features of hydrodynamics in the boundary layer of the nozzle of the developed surface  
**Shybetskyi V., Kostyk S.**
- 27** Influence of ventilated enclosing structures on the regulation of house energy supply  
**Lymarenko O.**
- 31** Development of methods of processing sensor signal  
**Kvasnikov V., Perederko A.**
- 34** Analysis of the heat exchange processes of the remote measurement device of mechanical values  
**Halytskyi V.**
- 38** Abstracts and References
