

TECHNOLOGY AUDIT AND PRODUCTION RESERVES

№ 4/1 (54), 2020

CONTENTS

MECHANICAL ENGINEERING TECHNOLOGY

- 4** Analysis of dual-flow plates with a large free section
Taranenko G.
- 8** Development of method of testing a set of screen-exhaust devices in the helicopter Mi-8MSB-B
Kinaschuk M.

ELECTRICAL ENGINEERING AND INDUSTRIAL ELECTRONICS

- 16** Estimation of the possibilities of the combined synchronization system with open-link to minimize the dispersion of the phase error when tracking the carrier frequency under the conditions of the influence of additive noise
Turovsky O.

TECHNOLOGY AND SYSTEM OF POWER SUPPLY

- 23** Adaptation of mathematical model of heat and energy characteristics of medium pressure boilers to real operating conditions
Zhitarenko V., Bejan V., Ostapenko O.

REPORTS ON RESEARCH PROJECTS

- 31** Simplified method of forecasting the influence of cooling intensity during hardening on the mechanical properties of steel products
Deyneko L., Kobasko N.
- 38** Analysis of the influence of binding adhesives on the structural strength of integral and semi-rigid covers
Paliukh O., Kyrychok P., Dziadyk E.
- 44** Researching the efficiency of buck converter synchronous rectifier
Zheliashkov Y.
- 51** Study of gamma-ray effects on relaxation oscillator based on unijunction transistor
Abd El-Basit W., Abd El-Maksood A. M.
- 56** Abstracts and References
