

# TECHNOLOGY AUDIT AND PRODUCTION RESERVES

№ 4/2(54), 2020

## CONTENTS

### INFORMATION TECHNOLOGIES

- 4 Development of an automated system for making multi-stage management decisions at industrial enterprises  
**Solodovnik G., Deynega A.**
- 10 Design of information technology classification based on medical data  
**Mulesa O., Snytyuk V., Trombola M., Ivazkevych V.**

### MATHEMATICAL MODELING

- 15 Determination of the influence area of a bridge crossing in a river stream  
**Slavinska O., Tsynka A.**
- 20 Comprehensive assessment of the quality condition of the road with drainage system  
**Bubela A.**

### REPORTS ON RESEARCH PROJECTS

- 27 Development of a multi-agent system for solving domain dictionary construction problem  
**Yaremenko V., Syrotiuk O.**
- 31 Presentation of Reed-Solomon codes based on automaton theory  
**Semerenco V.**
- 36 Measurement of material surface defect intensity by distributed cumulative histogram and clustering  
**Melnyk R., Kvit R.**
- 46 Finding the condition of finiteness of the discrete spectrum of a nonself-adjoint friedrichs model in the case of one-dimensional perturbation  
**Cheremnikh E., Ivasyk H., Oleksiv I.**
- 50 Abstracts and References
