**Journal of Optimization, Differential Equations and Their Applications** welcomes application-oriented articles with strong mathematical content in scientific areas such as deterministic and stochastic ordinary and partial differential equations, mathematical control theory, modern optimization theory, variational, topological and viscosity methods, qualitative analysis of solutions, approximation and numerical aspects. JODEA also provides a forum for research contributions on nonlinear differential equations and optimal control theory motivated by applications to applied sciences.

JODEA is published twice a year (in June and December).
