

Algebra  
and discrete  
mathematics

Contents

J. P. Acosta, O. Lezama	■ Universal property of skew <i>PBW</i> extensions	1
O. D. Artemovych, M. P. Lukashenko	■ Lie and Jordan structures of differentially semiprime rings	13
V. M. Bondarenko, Y. V. Zaciha	■ On characteristic properties of semigroups	32
P. Catarino, P. Vasco, H. Campos, A. P. Aires, A. Borges	■ New families of Jacobsthal and Jacobsthal-Lucas numbers	40
M. Dokuchaev, V. Kirichenko, M. Plakhotnyk	■ Quivers of $3 \times 3$ -exponent matrices	55
D. Koçak	■ Finitely presented quadratic algebras of intermediate growth	69
P. Kryszтовиak, M. M. Sysło	■ A tabu search approach to the jump number problem	89
A. Kukharev, G. Puninski	■ Serial group rings of finite groups. General linear and close groups	115
L. A. Kurdachenko, V. S. Yashchuk, I. Ya. Subbotin	■ Lattice groups	126
Ö. Küsmüş	■ On the units of integral group ring of $C_n \times C_6$	142
V. Ustimenko	■ On algebraic graph theory and non-bijective multivariate maps in cryptography	152
