

Algebra  
and discrete  
mathematics

Contents

A. K. Bhuniya, M. Kumbhakar	On the $le$ -semigroups whose semigroup of bi-ideal elements is a normal band	171
P. Danchev	On strongly almost $m\text{-}\omega_1\text{-}p^\omega + n$ -projective abelian $p$ -groups	182
M. Goncharov	On solvable $Z_3$ -graded alternative algebras	203
M. Jardim, D. M. Prata	Vector bundles on projective varieties and representations of quivers	217
L. Jones, D. White	A group-theoretic approach to covering systems	250
R. Kawaguchi	The lower bound for the volume of a three-dimensional convex polytope	263
M. Maloid-Glebova	Cyclic left and torsion-theoretic spectra of modules and their relations	286
M. A. Ollis	Constructing R-sequencings and terraces for groups of even order	297
O. Romaniv, A. Sagan	Quasi-Euclidean duo rings with elementary reduction of matrices	317
O. Pihura, B. Zabavsky	A morphic ring of neat range one	325
Yu. V. Zhuchok	Free abelian dimonoids	330
