

Algebra
and discrete
mathematics

Contents

T. Ahmed	■ On colouring integers avoiding t -AP distance-sets	1
V. Bondarenko, M. Bortos, R. Dinis, A. Tylyshchak	■ Indecomposable and irreducible t -monomial matrices over commutative rings	11
P. Doolan, S. Kim	■ The Littlewood-Richardson rule and Gelfand-Tsetlin patterns	21
M. Drushlyak, T. Lukashova, F. Lyman	■ Generalized norms of groups	48
A. B. Ganagi, H. S. Ramane	■ Hamming distance between the strings generated by adjacency matrix of a graph and their sum	82
F. Takıl Mutlu	■ Amply (weakly) Goldie-Rad-supplemented modules	94
T. Isaieva, M. Pratsiovytyi	■ Transformations of $(0,1]$ preserving tails of Δ^μ -representation of numbers	102
A. P. Petravchuk	■ On nilpotent Lie algebras of derivations of fraction fields	116
I. Raievska, M. Raievska, Ya. Sysak	■ Finite local nearrings with split metacyclic additive group	129
