

Algebra  
and discrete  
mathematics

Contents

|   |  |     |
|---|--|-----|
| V. Bokhonko,<br>B. Zabavsky                 | A criterion of elementary divisor domain<br>for distributive domains                                     | 1   |
| V. Bondarenko,<br>M. Stoika                 | On representations of the group of order two<br>over local factorial rings in the weakly<br>modular case | 7   |
| Yu. Drozd,<br>N. Golovashchuk,<br>V. Zembyk | Representations of nodal algebras of type E  | 16  |
| V. Futorny,<br>J. Schwarz                   | Galois orders of symmetric differential operators  | 35  |
| I. Kashuba,<br>S. Ovsienko,<br>I. Shestakov | On the representation type of Jordan<br>basic algebras   | 47  |
| M. Saorín                                   | Dg algebras with enough idempotents,<br>their dg modules and their derived<br>categories                 | 62  |
| R. Stekolshchik                             | Equivalence of Carter diagrams   | 138 |
| P. Zadunaisky                               | A new way to construct 1-singular<br>Gelfand-Tsetlin modules   | 180 |
