**PHYTOTHERAPY AND HOMEOPATHIC
TREATMENT OF THYROIDITIS**

Key words: thyroiditis, homeopathic remedy, phytotherapeutic remedy.

The subacute thyroiditis is treated in the acute phase of disease with such homeopathic medicines as Aconitum, Belladonna, Arsenicum iodatum, Cactus. In the subacute stage of the disease homeopathic drugs Scrophularia, Conium, Calcarea iodata are used. During the rehabilitation it is recommended to use the herbal remedy from the rhizomes of *Potentilla alba*.

PECULIARITIES OF ETIOPATHOGENESIS, CLINIC AND DIAGNOSIS OF GALLBLADDER CHOLESTEROSIS (LITERATURE REVIEW)

Key words: cholesterosis, lipid exchange, cholesecretor function, cholelithiasis, sonography.

The data about etiology, pathogenesis, clinical symptoms, classification, lipid exchanges of gallbladder cholesterosis are given. The interaction between liver cholesecretor dysfunction, gallbladder cholesterosis and cholelithiasis are shown. The principal method of investigation for diagnosing various forms of gallbladder cholesterosis is US.
