

## Contents

**129-138**

**Performance limits of terahertz zero biased rectifying detectors for direct detection**

*A.G. Golenkov, F.F. Sizov*

**139-148**

**Protective applications of vacuum-deposited perfluoropolymer films**

*K.P. Grytsenko, Yu.V. Kolomzarov, O.E. Belyaev, S. Schrader*

**149-155**

**Detection of IR and sub/THz radiation using MCT thin layer structures: design of the chip, optical elements and antenna pattern**

*F.F. Sizov, Z.F. Tsybrii, V.V. Zabudsky, M.V. Sakhno, A.V. Shevchik-Shekera, S.Ye. Dukhnin, A.G. Golenkov, E. Dieguez, S.A. Dvoretzky*

**156-161**

**Enhanced optical transmission of the triple-layer resonant waveguide structure**

*I.Ya. Yaremchuk, V.M. Fitio, Ya.V. Bobitski*

**162-168**

**Van der Waals interaction between surface and particle with giant polarizability**

*K.A. Makhnovets*

**169-172**

**New method for estimating the refractive index of optical materials in spectrally selective elements**

*A.A. Manko, G.S. Svechnikov*

**173-182**

**Influence of field dependent form of collision integral on kinetic coefficients**

*I.I. Boiko*

**183-187**

**Low doses effect in GaP light-emitting diodes**

*O.M. Hontaruk, O.V. Konoreva, Ye.V. Maliy, I.V. Petrenko, M.B. Pinkovska, O.I. Radkevych, V.P. Tartachnyk*

**188-191**

**Precise measurements of the wavelength in KrCl laser spectral region (222 nm)**

*N.G. Zubrilin, I.A. Pavlov, S.M. Baschenko, O.M. Tkachenko*

**192-196**

**Optical studies of as-deposited and annealed Cu<sub>7</sub>GeS<sub>5</sub>I thin films**

*I.P. Studenyak, A.V. Bendak, S.O. Rybak, V.Yu. Izai, P. Kúš, M. Mikula*

**197-200**

**ZnTe-based UV sensors**

*S.Yu. Pavelets, Yu.N. Bobrenko, T.V. Semikina, G.I. Sheremetova, B.S. Atdaiev, K.B. Krulikovska, M.A. Mazin*

**201-204**

**Dielectric spectroscopy of CuInSe<sub>2</sub> single crystals**

*S.N. Mustafaeva, S.M. Asadov, D.T. Guseinov, I. Kasimoglu*

**205-207**

**Structural properties of chalcogenide glasses As<sub>2</sub>Se<sub>3</sub> doped with manganese**

*O.P. Paiuk, L.A. Revutska, A.V. Stronski, A.Yo. Gudymenko, H.V. Stanchu, A.A. Gubanova, Ts.A. Kryskov*

**208-214**

**Variational approach to the calculation of the lowest Wannier exciton state in wide type-II single semiconductor quantum wells**

*G.V. Vertsimakha*

**215-219**

**Integration of LED/SC chips (matrix) in reverse mode with solar energy storage**

*V.I. Osinsky, I. Masol, I. Feldman, A. Diagilev, N.O. Sukhovii*

**220-224**

**Possible mechanism of inhibition of virus infectivity with nanoparticles**

*O.L. Khylyko, N.M. Rusinchuk*

**225 Information for contributors**

**226 Publication Ethics and Publication Malpractice Statement**

**227 Contents**
