

Contents

11-18 Analysis of multichannel optical rotary connectors based on the compensation operating principle with mirror and prismatic optical compensators (Part 1)

V.M. Shapar, V.S. Lysenko, A.V. Savchuk

19-25 Electronic structure of Ag_8GeS_6

D.I. Bletska, I.P. Studenyak, V.V. Vakulchak, A.V. Lukach

26-33 Metallic nanoparticles (Cu, Ag, Au) in chalcogenide and oxide glassy matrices: comparative assessment in terms of chemical bonding

O.I. Shpotyuk, M.M. Vakiv, M.V. Shpotyuk, S.A. Kozyukhin

34-40 Influence of non-radiative exciton recombination in silicon on photoconversion efficiency. 2. Short Shockley-Read-Hall lifetimes

A.V. Sachenko, V.P. Kostyl'ov, V.M. Vlasiuk, R.M. Korkishko, I.O. Sokolovskiy, V.V. Chernenko, M.A. Evstigneev

41-47 Design and characterization of nanostructured SERS substrates based on gold nanostars

V.O. Yukhymchuk, O.M. Hreshchuk, M.Ya. Valakh, Ye.G. Gule, M.A. Skoryk, V.S. Efanov, N.A. Matveevskaya, T.G. Beynik

48-54 Micro- and nanostructuring of metal surfaces with polarized femtosecond laser pulses

[N.G. Zubrilin], I.V. Blonskiy, I.M. Dmitruk, O.E. Dombrovskiy, N.I. Berezovska, V.I. Stiopkin

55-63 An original way to obtain porous $\text{Zn}_{(1-x)}\text{Mg}_x\text{O}$ thin films by spray pyrolysis technique

Abdelhakim Mahdjoub, Abdelaali Hafid, Mohammed Salah Aida, Abdelhamid Benhaya

64-68 Structural and optical studies of $\text{Cu}_x\text{PSe}_5\text{I}$ -based thin film deposited by magnetron sputtering

I.P. Studenyak, M.M. Kutsyk, A.V. Bendak, V.Yu. Izai, V.V. Bilanchuk, P. Kúš, M. Mikula

69-73 Evidence for resonant bonding in phase-change materials studied by IR spectroscopy

K. Shportko, H. Volker, M. Wuttig

74-78 Influence of the composition of $(\text{TlGaS}_2)_{1-x}(\text{TlInSe}_2)_x$ solid solutions on their physical properties

S.N. Mustafaeva, S.G. Jafarova, E.M. Kerimova, N.Z. Gasanov, S.M. Asadov

79-84 Determination of fundamental optical constant of Zn_2SnO_4 films

A.O. Salohub, A.A. Voznyi, O.V. Klymov, N.V. Safryuk, D.I. Kurbatov, A.S. Opanasyuk

85-90 Resonance phenomena in one-dimensional grating-based structures.

Ya. Yaremchuk, V.M. Fitio, Ya.V. Bobitski

91-95 The influence of ethylene glycol on the chemical interaction of PbTe and $\text{Pb}_{1-x}\text{Sn}_x\text{Te}$ crystals with H_2O_2 - HBr -ethylene glycol etching compositions

G.P. Malanych, V.M. Tomashyk, O.S. Lytvyn

96-104 Correlation optical microscopy of anisotropic biological layers

A.G. Ushenko, A.V. Dubolazov, Yu.A. Ushenko, M.Yu. Sakhnovskiy, O.V. Olar, A.V. Motrich, P.O. Angelsky

105-109 Effect of thermal annealing on electrical and photoelectrical properties of n - InSb

S.V. Stariy, A.V. Sukach, V.V. Tetyorkin, V.O. Yukhymchuk, T.R. Stara

110-117 Methods of Fourier-Stokes polarimetry and the spatial-frequency filtering in the diagnostic tasks

A.G. Ushenko, A.V. Dubolazov, M.Yu. Sakhnovskiy, A.V. Motrich, Yu.A. Ushenko, L.Y. Pidkamin, L.Ya. Kushnerik, M.S. Gavrylyak, P. Grygorishin

118-122 Model of smoothing roughness on GaAs wafer surface by using nonabrasive chemical-and-mechanical polishing

A.V. Fomin, G.A. Pashchenko, M.Yu. Kravetskiy, I.G. Lutsyshyn

123-128 Dependence of the anisotropy parameter of drag thermo-emf on the impurity concentration in the n -type germanium and silicon crystals

G.P. Gaidar, P.I. Baranskii

129-136 Differentiation of Mueller-matrix invariants of biological tissues fibrillar networks with different phase and amplitude anisotropy

A.G. Ushenko, A.V. Dubolazov, Yu.A. Ushenko, L.Ya. Kushnerick, M.Yu. Sakhnovskiy, V.G. Zhytaryuk, I. Lacusta, O.G. Prydiy, P. Grygorishin

137-141 Influence of Mn doping on ZnO defect-related emission

T.R. Stara, I.V. Markevich

142-148

Jones-matrix mapping of optically anisotropic fluorophores of molecular biological tissues in the diagnosis of death causes

A.G. Ushenko, A.V. Dubolazov, Yu.A. Ushenko, L.Ya. Kushnerick, M.Yu. Sakhnovskiy, V.G. Zhytaryuk, I. Lacusta, O.G. Prydiy, P. Grygorishin
