#### **Summary**

**Vynnyk U. The Humanistic Orientation of the Doctrine of Mykola Berdyayev about the Technosphere.** *The article researches views of M. Berdyayev regarding the man and the technics. The philosophical, technical and anthropological principles of his philosophical concept are investigated. The special attention is drawn to the specifics of the existence of natural man in artificially created technical area in accordance with the opinion of the philosopher. The number of problems of our time that are related to the technosphere are considered from the point of view of humanely directed existential philosophy of M. Berdyayev. The main provisions of the metaphysics of technics, the essence of technocratic paradigm of thinking and human activities are traced. Basic criteria for consideration of technics from the standpoint of the man as a measure in a thinker's philosophical views are defined. Philosophical and technical views of philosopher are considered in the context of historical and philosophical discourse concerning the problem of "man and technics".* **Keywords:** man, individual, spirituality, humanism, existence, alienation, technics, technical civilization, technosphere.
