Summary

Shashkova L. Paradigms in Science and Theology: Methodological Possibilities Reception. The article discusses the methodological possibilities of relations between science and religion in optics philosophy of science and theology, attempts reinterpretation principle of complementarity and the possibility of methodological reception. Described and identified the position of theory of paradigm (T.Kuhn) and methodological pluralism (P.Foyerabend). Consider H.Kung ideas for changing paradigms in theology and analyzes new I.Barbur's ideas to the existence of parallels, which confirm the reality of complementarity cognitive and methodological procedures of modern science and religion. Based on the general structures of experience and interpretation of science and religion explained the methodological possibilities of reception ideas of paradigm, pluralism and research programs to the scope of religious knowledge. The author conceptualized the ideas of social epistemology to the problems of relationship between science and religion in the cultural and historical context. **Keywords:** science, religion, theology, philosophy and methodology of science, paradigm, pluralism, complementarity, reception.
