

Nanostructures and impurity centers in cryogenic environment

Guest Editors Claudine Crépin-Gilbert and Elena Savchenko

<i>A. Endo, M. Hatanaka, N. Ueno, Y. Morisawa, and T. Wakabayashi</i> Bi ₂ Ne: Weakly bound cluster of diatomic bismuth with neon	807
<i>M. Lara-Moreno, J. Alvarez-Hernández, H. Negrín-Yuvero, J.G. McCaffrey, and G. Rojas-Lorenzo</i> Effects of trapping site on the spectroscopy of ¹ P ₁ excited group 12 metal atoms in rare gas matrices	816
<i>N.N. Kleshchina, I.S. Kalinina, R. Lambo, A.A. Buchachenko, D.S. Bezrukov, and S.-M. Hu</i> Triplet emission of atomic ytterbium isolated in a xenon matrix	827
<i>P. de Pujo, M. Ryan, C. Crépin, J.-M. Mestdagh, and J.G. McCaffrey</i> The role of spin-orbit coupling in the optical spectroscopy of atomic sodium isolated in solid xenon	836
<i>I.V. Khyzhniy, S.A. Uytunov, M.A. Bludov, E.V. Savchenko, and V.E. Bondybey</i> Electron-induced delayed desorption of solid argon doped with methane	843
<i>K. Ban, M. Akiwa, H. Ueta, T. Tachibana, and T. Hirayama</i> New ion desorption mechanism from rare gas solids by multiply charged ion impacts	850
<i>R.E. Boltnev, I.B. Bykhalo, V.V. Khmelenko, I.N. Krushinskaya, D.M. Lee, P.T. McColgan, S. Sheludiakov, and A.A. Pelmenov</i> Luminescence of molecular nitrogen in cryogenic plasmas	856
<i>Adil Meraki, Patrick T. McColgan, Sergei Sheludiakov, David M. Lee, and Vladimir V. Khmelenko</i> Thermoluminescence of nitrogen–neon and nitrogen–argon nanoclusters immersed in superfluid helium	862
<i>N.I. Ostapenko, O.A. Kerita, Yu.V. Ostapenko, and M.V. Chursanova</i> Effect of the polymer ordering on the optical spectra and thermoluminescence of polygermane and polysilane films and nanocomposites	874
<i>V.A. Karachevtsev, A.M. Plokhotnichenko, M.V. Karachevtsev, A.S. Linnik, and N.V. Kurnosov</i> Composite films of single-walled carbon nanotubes with strong oxidized graphene: characterization with spectroscopy, microscopy, conductivity measurements (5–291 K) and computer modeling	881
<i>S.B. Feodosyev, I.A. Gospodarev, E.V. Manzhelii, V.A. Sirenko, and E.S. Syrkin</i> Discrete atomic vibrations localized on defects in linear chains of atoms adsorbed by carbon nanobundles	892

Надпровідність, зокрема високотемпературна

<i>Н.В. Кленов, А.В. Кузнецов, А.Е. Щеголев, И.И. Соловьев, С.В. Бакурский, М.Ю. Куприянов, М.В. Терешонок</i> Нейрон на основе одного потокового кубита	898
<i>А.П. Шаповалов, В.Е. Шатерник, О.Г. Турутанов, В.Ю. Ляхно, В.И. Шнырков</i> О возможности увеличения скорости регистрации изменений магнитного потока в счетчике одиночных фотонов ВЧ СКВИДом с контактом MoRe–Si(W)–MoRe	906
<i>Г.Я. Хаджай, Ю.В. Литвинов, Р.В. Вовк</i> Эволюция поперечного электросопротивления монокристаллов YBa ₂ Cu ₃ O _{7–δ} при воздействии облучения высокоэнергетическими электронами	916

Низькотемпературний магнетизм

<i>Ю.А. Перевозчикова, А.А. Семянникова, А.Н. Доможирова, П.Б. Терентьев, Е.Б. Марченкова, Е.И. Патраков, М. Eisterer, П.С. Коренистов, В.В. Марченков</i> Экспериментальное наблюдение аномалий электрических, магнитных и гальваномагнитных свойств сплавов Гейслера на основе кобальта при изменении содержания переходных элементов	921
<i>Г.И. Мамниашвили, Т.О. Гегечкори, Ц.А. Гавашели</i> Влияние низкочастотного магнитного поля на свойства основного и дополнительного сигналов эха в марганцевом феррите	928

Квантові ефекти в напівпровідниках та діелектриках

<i>V.N. Ermakov and E.A. Ponezha</i> Nonlinear resonant tunneling as mechanism of cool electrons filtration	938
---	-----

Низькотемпературна фізика пластичності та міцності

<i>Р.В. Смолянец, В.А. Москаленко</i> Низкотемпературная особенность зернограничного упрочнения нанокристаллического титана	947
---	-----

Nanostructures and impurity centers in cryogenic environment

Guest Editors Claudine Crépin-Gilbert and Elena Savchenko

<i>V.A. Karachevtsev, A.M. Plokhotnichenko, M.V. Karachevtsev, A.S. Linnik, and N.V. Kurnosov</i> Composite films of single-walled carbon nanotubes with strong oxidized graphene: characterization with spectroscopy, microscopy, conductivity measurements (5–291 K) and computer modeling	881
<i>S.B. Feodosyev, I.A. Gospodarev, E.V. Manzhelii, V.A. Sirenko, and E.S. Syrkin</i> Discrete atomic vibrations localized on defects in linear chains of atoms adsorbed by carbon nanobundles	892

Superconductivity, Including High-Temperature Superconductivity

<i>N.V. Klenov, A.V. Kuznetsov, A.E. Schegolev, I.I. Soloviev, S.V. Bakurskiy, M.Yu. Kupriyanov, and M.V. Tereshonok</i> Neuron based on a single flux qubit	898
<i>A.P. Shapovalov, V.E. Shaternik, O.G. Turutanov, V.Yu. Lyakhno, and V.I. Shnyrkov</i> About a possibility of faster detection of magnetic flux changes in a single-photon counter by RF SQUID with MoRe–Si(W)–MoRe junction	906
<i>G.Ya. Khadzhai, Yu.V. Litvinov, and R.V. Vovk</i> Evolution of the transverse electrical resistance of YBa ₂ Cu ₃ O _{7-δ} single crystals under irradiation with high-energy electrons	916

Low-Temperature Magnetism

<i>Yu.A. Perevozchikova, A.A. Semiannikova, A.N. Domozhirova, P.B. Terentyev, E.B. Marchenkova, E.I. Patrakov, M. Eisterer, P.S. Korenistov, V.V. Marchenkov</i> Experimental observation of anomalies in the electrical, magnetic, and galvanomagnetic properties of cobalt-based Heusler alloys with variation of transition elements	921
<i>G.I. Mamniashvili, T.O. Gegechkori, and T.A. Gavasheli</i> Effect of a low-frequency magnetic field on the properties of the main and additional echo signals in manganese ferrite	928

Quantum Effects in Semiconductors and Dielectrics

<i>V.N. Ermakov and E.A. Ponezha</i> Nonlinear resonant tunneling as mechanism of cool electrons filtration	938
---	-----

Low-Temperature Physics of Plasticity and Strength

<i>R.V. Smolianets and V.A. Moskalenko</i> Low-temperature feature of grain-boundary hardening of nanocrystalline titanium	947
--	-----
