
C O N T E N T S

Valerii Volodymyrovych Buldygin	1
<i>Gerold Alsmeyer, Andrea Winkler</i> Metabasins — a state space aggregation for highly disordered energy landscapes	3
<i>S. Alvarez-Andrade</i> Perturbed self-intersection local time	45
<i>A. B. Kharazishvili</i> Ergodic measures and the definability of subgroups via normal extensions of such measures	58
<i>Seiji Hiraba</i> Independent infinite Markov particle systems with jumps	65
<i>T. I. Kosenkova</i> Weak convergence of a series scheme of Markov chains to the solution of a Lévy driven SDE	86
<i>Alexei M. Kulik, Daryna D. Soboleva</i> Large deviations for one-dimensional SDE with discontinuous diffusion coefficient	101
<i>A. Pogorui</i> The distribution of random motion in semi-Markov media	111
<i>M. V. Tantsiura</i> On the generalization of the McKean–Vlasov equation to the case where the total mass of particles is infinite	119
