

## C O N T E N T S

<i>V. I. Bogachev, A. F. Miftakhov</i>	On weak convergence of finite-dimensional and infinite-dimensional distributions of random processes	<b>1</b>
<i>Alexander Iksanov, Serguei Polotskiy</i>	Tail behavior of suprema of perturbed random walks	<b>12</b>
<i>A. V. Ivanov, I. V. Orlovsky</i>	Asymptotic normality of linear regression parameter estimator in the case of random regressors	<b>17</b>
<i>B. I. Kopytko, R. V. Shevchuk</i>	On Feller semigroups associated with one-dimensional diffusion processes with membranes	<b>31</b>
<i>S. M. Krasnitskiy, O. O. Kurchenko</i>	Baxter type theorems for generalized random Gaussian processes	<b>45</b>
<i>G. M. Molyboga</i>	An analogue of the Berry-Esseen theorem for functionals of weakly ergodic Markov processes	<b>53</b>
<i>M. M. Osypchuk</i>	On some perturbations of a symmetric stable process and the corresponding Cauchy problems	<b>64</b>
<i>N. V. Prokhorenko (Kruglova)</i>	On some generalizations of the results about the distribution of the maximum of the Chentsov random field on polygonal lines	<b>73</b>
<i>O. O. Synyavska</i>	Interval estimation of the fractional Brownian motion parameter in a model with measurement error	<b>84</b>
<i>M. V. Tantsiura</i>	On strong solutions to countable systems of SDEs with interaction and non-Lipschitz drift	<b>91</b>
