

CONTENTS

| | |
|---|----|
| Appearance of spiral patterns at the interference of spherical and vortex-bearing waves in the cases of torsion- and electric field-induced vortices in crystals <i>Vasylykiv Yu., Skab I. and Vlokh R.</i> | 51 |
| Modelling and simulation of a 1.6 Tb/s optical system based on multi-diagonal code and optical code-division multiple-access <i>Thanaa Hussein Abd, S. A. Aljunid, Hilal Adnan Fadhil, M. N. Junita and N. M. Saad</i> | 54 |
| Polarisation characteristics of optical waves in crystals in the presence of weak optical activity <i>Adamenko D., Kostyrko M. and Vlokh R.</i> | 67 |
| Effect of transverse distribution profile of thulium on the performance of thulium-doped fibre amplifiers <i>Emami S.D., Abdul-Rashid H.A., Ahmad H.,² Ahmadi A. and Harun S.W.</i> | 74 |
| The method for measuring piezooptic coefficients of crystals using a crystalline disk loaded along its diameter <i>Savaryn V., Skab I., Krupych O. and Vlokh R.</i> | 82 |
