

CONTENTS

Excitonic quasi-molecule consisting of two semiconductor quantum dots: A theory. <i>Pokutnyi S. I. and Salejda W.</i>	91
Structure and characterization for optical limiting applications of a new organic crystal – isonicotinamide bis-p-aminobenzoic acid <i>Vijayalakshmi A., Vidyavathy Balraj and Vinitha G.</i>	98
Magneto optic rotation and thermal expansion of AgGaGeS ₄ crystals <i>Adamenko D., Say A., Parasyuk O., Martynyuk-Lototska I. and Vlokh R.</i>	105
Spectral reflectance recovery from a white-balanced RGB image based on the algorithm of compressive sensing <i>Zhang Leihong, Liang Dong, Li Bei, Kang Yi, Zhang Dawei and Ma Xiuhua</i>	112
Ellipsometric studies of nanocrystalline silicon films with the thicknesses less than 100 nm <i>Buchenko V. V. and Goloborodko A. A.</i>	124
Ultraflat broadband supercontinuum in highly nonlinear Ge _{11.5} As ₂₄ Se _{64.5} photonic crystal fibres <i>Sandeep Vyas, Takasumi Tanabe, Ghanshyam Singh and Manish Tiwari</i>	132
