

CONTENTS

Lasing in a hybrid-aligned cholesteric	
<i>Nastishin Yu.A., Dudok T.H., Hrabchak V.I., Lychkovskyy E., Yakovlev M.Yu., Vankevych P.I., Meyer C. and Pansu B.</i>	121
Topological defects of optical indicatrix orientation in optically biaxial crystals. The case of light propagation in the directions close to the optic axes	
<i>Krupych O., Vasylkiv Yu., Kryvyy T., Skab I. and Vlokh R.</i>	131
Optical absorption and luminescence spectra of 2,5-di-(2-benzoxazolyl)phenol in the solid state	
<i>Syetov Y.</i>	139
Studies on the key methods for compressive ghost-image tracking based on background subtraction	
<i>Zhang Leihong, Kang Yi, Li Bei, Zhan Wenjie, Zhang Dawei and Ma Xiuhua</i>	143
Fusion of infrared and visible images based on nonsubsampled shearlet transform and block compressive sensing sampling	
<i>Defa Hu and Hailiang Shi</i>	156
Optimized acousto-optic modulation for the <i>V</i> -type electromagnetically induced transparency in rubidium-87 D ₁ line	
<i>Dastan Khalid and Hawri O. Majeed</i>	168
Studies of concentration dependence of the fluorescent quantum yield from rhodamine 6G and Au–Pd core–shell nanorods, using a response surface methodology	
<i>Ekkachai Rammarat, Kitsakorn Locharoenrat, Witoon Yindeesuk and Pattareeya Damrongsak</i>	179
