

CONTENTS

Fields and Elementary Particles

- Borisenko O., Chelnokov V., Kushnir V.* Phenomenological Renormalization Group and Cluster Approximation 655
- Lompay R.R., Petrov A.N.* Covariant Differential Identities and Conservation Laws in Metric-Torsion Theories of Gravitation 663

Optics, Lasers, and Quantum Electronics

- Sizhuk A.S.* One-Photon Scattering by N -Atom System: Application to One- and Two-Mode Resonator 677

Soft Matter

- Bulavin L.A., Gotsulskiy V.Ya., Chechko V.E.* Peculiarities in the Establishment of Equilibrium State in Diluted Aqueous Solutions of Glycerol 689

Solid Matter

- Sukhachov P.O.* Gap Generation in Weyl Semimetals in a Model with Local Four-Fermion Interaction 696
- Freik D.M., Mudryi S.I., Gorichok I.V., Dzumedzey R.O., Krynytskyi O.S., Lyuba T.S.* Charge Carrier Scattering Mechanisms in Thermoelectric PbTe:Sb 706

- Gavrylyuk O.O., Semchuk O.Yu., Steblova O.V., Ev-tukh A.A., Fedorenko L.L.* Study of the Distribution of Temperature Profiles in Nonstoichiometric SiO_x Films at Laser Annealing 712
- Marushko I.O.* Theorem of Differentiation of the Energy of a Multiatomic System with Respect to Atomic Coordinates (Part I) 719
- Vainberg V.V., Pylypchuk A.S., Poroshin V.N., Sar-bey O.G.* Effects of the Real-Space Transfer of Charge Carriers in the n -AlGaAs/GaAs Heterostructures with the Delta-Layers of Impurity in the Barriers 721

Nanosystems

- Balabai R.M., Gorbanyuk T.I., Litovchenko V.G., Cher-nikova H.N.* Activation of Catalytic Properties of Metal Nanoclusters 726

General Problems of Theoretical Physics

- Gavryushenko D.A., Korobko O.V., Sysoev V.M., Cherev-ko K.V.* Entropy Production by the Diffusion Process in a Plane-Parallel Pore in the Case of Scatchard–Hamer Solution 732
- Ushcats M.V.* Modification of the Mayer Sampling Meth-od for the Calculation of High-Order Virial Coefficients . . 737
