

CONTENTS

Fields and Elementary Particles

Prykarpatsky A.K., Bogolubov N.N. On the Classical Maxwell–Lorentz Electrodynamics, the Electron Inertia Problem, and the Feynman Proper Time Paradigm 187

Atoms and Molecules

Mykytenko N. Radiation-Induced Formation of “Heavy” Clusters in Binary Crystals 213

Soft Matter

Piatnytskyi D.V., Zdorevsky O.O., Perepelytsya S.M., Volkov S.N. Formation of Complexes of Hydrogen Peroxide Molecules with DNA 219

Kolodnytska R.V., Kryzhanivskyy V.B., Moskvina P.P. Multifractal Analysis of Marks Left by Droplets of Dispersed Diesel Fuels with Various Chemical Compositions 226

Solid Matter

Manilov A.I. Problems of Application of Porous Silicon to Chemical and Photocatalytic Production of Hydrogen 233

Vinichenko V.A., Buchenko V.V., Goloborodko N.S., Lendel V.V., Lushkin A.E., Telega V.N. Optical and Electrophysical Properties of 95% In₂O₃ + 5% SnO₂/ns-Si Heterostructure 240

Nakhodkin M.G., Fedorchenko M.I. Photoelectron Emission from Si–Gd–O Cathode 248

Nanosystems

Butenko D.V., Tomchuk P.M. Influence of the Magnetic Dipole Moment of a Metal Nanoellipsoid on the Scattering of Electromagnetic Waves 255

General Problems of Theoretical Physics

Kharchenko D.O., Kharchenko V.O., Bashtova A.I. Self-Organization of an Ensemble of Vacancies under the Spinodal Decomposition of Binary Systems at Continuous Irradiation 265
