

CONTENTS

Nuclei and Nuclear Reactions

Abrosimov V.I., Davidovskaya O.I. Residual Interaction Effect on Isoscalar Dipole Modes in Heavy Nuclei 565

Optics, Lasers, and Quantum Electronics

Mel'nyk D.B., Yashchuk V.M., Naumenko A.P., Gerasyov A.O., Kachkovski O.D. Violation of Ideal Polymethine State in Merocyanines with a Long Chromophore 572

Plasmas and Gases

Herashchenko S.S., Makhlai V.A., Aksenov N.N., Garkusha I.E., Byrka O.V., Kulik N.V., Chebotarev V.V., Stal'tsov V.V. Erosion of the Combined Three-Dimensional Tungsten Target under the Impacts of QSPA Kh-50 Powerful Plasma Streams 578

Soft Matter

Bulavin L.A., Vergun L.Yu., Zabashta Yu.F., Ogorodnik K.O. Saccharide Solutions under the Magnetic Field Action 583

Solid Matter

Lysenko I.O. Analysis of the Formation of Stationary Patterns at the Ion Sputtering within the Anisotropic Kuramoto–Sivashinsky Model 588

Baran O.R., Verkholyak T.M. Two-Dimensional Spin- $1/2J_1 - J'_1 - J_2$ Heisenberg Model within Jordan–Wigner Transformation 597

Krymus A.S., Myronchuk G.L., Parasyuk O.V. Influence of Cu-, Sn-, and In-Doping on Optical Properties of Ag-GaGe₃Se₈ Single Crystals 606

Braiorr-Orrs B., Weyrauch M., Rakov M.V. Numerical Studies of Entanglement Properties in One- and Two-Dimensional Quantum Ising and XXZ Models 613

General Problems of Theoretical Physics

Teslenko V.I., Petrov E.G. Regularization of Environment-Induced Transitions in Nanoscopic Systems 627

Nonlinear Processes

Grytsay V.I. Self-Organization and Chaos in the Metabolism of Hemostasis in a Blood Vessel 648
