Fields and Elementary Particles

Kovalchuk V.A., Korchin A.Yu. Higgs Boson Decay to Lepton Pair and Photon and Possible Non-Hermiticity of the Yukawa Interaction 557

Nuclei and Nuclear Reactions

Levon A.I. Statistical Analysis of the Distribution of 0^+ State Energies in the Actinide Nuclei 565

Atoms and Molecules

Krech A.V., Galunov N.Z. Composite Scintillators and Some Features of Their Radiation Resistance 569

Optics, Lasers, and Quantum Electronics

Abd H.J., Almahanna M.S. Suppression of a Nonlinear Effect for High Data Transmission Rate Systems with a Wavelength Division Multiplexer Using the Optimization of Fiber Properties 583

Kabir M.H., Alam Miah M.B., Asaduzzaman S., Ahmed K. Slotted Core Circular PCF in Chemical Sensing Applications 589

Plasmas and Gases

Malinina A.A., Shuaibov A.K., Malinin A.N. Mechanism of Growth of the Intensity of Radiation Emitted in the Blue-Violet Spectral Interval by Gas-Discharge Plasma Generated in the Mixtures of Mercury Diiodide Vapor, Xenon, and Neon 594

Soft Matter

Lev B.I. Aggregation of Nanoparticles in a Nematic Liquid Crystal 599

Solid Matter

Litovchenko V.G., Gorbanyuk T.I., Solntsev V.S. Mechanism of Adsorption-Catalytic Activity at the Nanostructured Surface of Silicon Doped with Clusters of Transition Metals and Their Oxides 605

Kupchak I., Serpak N. Electronic and Magnetic Properties of Spinel Co_3O_4 (111) Surface in GGA + U Approximation 615

Nanosystems

Grygorchak I.I., Hryhorchak O.I., Ivashchyshyn F.O. Modification of the Properties of $\text{InSe}\langle\beta\text{-CD}\langle\text{FeSO}_4\rangle\rangle$ Clathrate/Cavitate Complexes with Hierarchical Architecture at Their Synthesis in Crossed Electric and Light-Wave Fields 625

General Problems of Theoretical Physics

Antia A.D., Ituen E.E. Nonrelativistic Treatment of Schrödinger Particles under Inversely Quadratic Hellmann plus Ring-Shaped Potentials 633

Astrophysics and Cosmology
