

Agricultural Science and Practice

1 • 2015

Contents

| | |
|---|----|
| Quinoa as a promising pseudocereal crop for Ukraine <i>S. L. Mosyakin, V. V. Schwartau</i> | 3 |
| Breeding and usage of sugar beet cultivars and hybrids resistant to sugar beet nematode <i>Heterodera schachtii</i> <i>L. A. Pylypenko, K. A. Kalatur</i> | 12 |
| The importance of agroecology in the process of well-balanced agrosphere formation <i>O. I. Furdychko, O. S. Demyanyuk</i> | 23 |
| Recent data on the causative agent of pale green dwarf (<i>Acholeplasma laidlawii</i> var. <i>granulum incertae sedis</i>) in Ukraine: pathogenicity and virulence factors and host reactions <i>K. S. Korobkova, V. P. Patyka</i> | 30 |
| Regulation of nitrogen-carbon interactions in agroecosystems in the forest-steppe zone of Ukraine <i>V. A. Velichko, O. V. Demidenko</i> | 35 |
| Soil Spatial Heterogeneity and Systems of Agriculture <i>V. V. Medvedev</i> | 50 |
| Detection of antibiotics, active against <i>Bacillus subtilis</i> , in grain and feed <i>O. V. Trufanov, A. M. Kotyk, V. A. Trufanova, O. V. Tereshchenko, O. M. Zhukorskiy</i> | 60 |
| Transforming growth factor $\beta 1$, pituitary-specific transcriptional factor 1 and insulin-like growth factor I gene polymorphisms in the population of the Poltava clay chicken breed: association with productive traits <i>R. A. Kulibaba, A. V. Tereshchenko</i> | 67 |
| Influence of humus acids on mobility and biological availability of iron, zinc and copper <i>A. I. Fateev, D. O. Semenov, K. B. Smirnova, A. M. Shemet</i> | 73 |
