Kapitanets S. V. Social and psychological component of professional competence of officials of the SFS

In the article, the authors argue that the authors argue that reforming the fiscal service will result in significant changes in the system of SFS. It will require adjustment cadres of fiscal Service and will stand up the question: how today are cadres of SFS prepared for quality implementation of new features, missions, acquisition of new competencies.

Professional activities of the officials of system SFS requires a wide range of advanced features of a person. It changes professional selection on objectively difficult choice of the most prepared people for the fiscal service.

Thus, professionally important qualities of social and psychological components of professional competence in the activities of officials of fiscal services are studied in the article. Peculiarities are described and value of professionally important qualities of motivation, communication and intellectual, professional management blocks is proven. The need for consideration of social and psychological components of professional competence of officials of the SFS in the implementation of human resources policy at all its stages is substantiated. It is proposed: to promote the development of professionally important qualities of social and psychological components of professional competence through advanced training of officers of the SFS, passing the specialized training, thematic permanent and short-term seminars, courses, etc.; to attract professional psychologists to assist in the implementation of operational tasks in the work with human resources.

Key words: *officials of the system of the SFS, staff subdivisions of the SFS, social and psychological component, professional competence, professionally important qualities.*
