

ABSTRACTS

Energy saving

YU. M. MATSEVITY, N. G. GANJA, A.V. KHIMENKO. EVALUATION OF ENERGY EFFICIENCY OF SYSTEMS ELECTRIC THERMAL STORAGE HEATING OF CIVIL BUILDINGS

The article is devoted to consideration of question of expediency using electric thermal storages for heating civil buildings and definition of economic efficiency of systems electric thermal storage.....9

I. A. CHIZHEVSKAJ. ON WAY TO THE ENERGY EFFECTIVE STATE. NECESSARY STEPS ARE IN ELECTROENERGY

In the article the programs and achievements are considered in area of энергоэффективности, as separate direction of general energy, in the developed countries of the world and in Ukraine.....17

Power engineering

B. N. MINKO. MODERN CRITERION OF OPTIMALITY OF WITH LARGE OVERALL OF PARAMETERS OF ELECTRIC BIG-TICKETS (TURBOGENERATORS)

The Organized analysis mass-gabarit parameter to designs of the large electric machines. The efficient criterion optimum mass-gabarit parameter is Worded on example of the analysis design turbo-alternator with air system of the cooling. Motivated intercoupling offered criterion optimum with internal feature of the generator. The Stated results to theoretical approbation criterion, on the base which is installed value to inaccuracy got given on criterion.

Keywords: *criterion of optimality, массогабаритные parameters, turbogenerator, analysis of construction, competitiveness.....25*

O. A. BABENKO. FLEXIBLE MATHEMATICAL MODELS FOR RAISING OF RATIONAL MODES OF HEAT TEMPERING BY THE HEAT POWER STATION HEATING BLOCKS

Informational model of turboplant T-100/120-130 for research heat tempering modes by the heat power station heating blocks is created. Verification of created model on basis of operating measuring results of five Kharkov heat power station heating blocks № 1 and № 2 is realized.....36

Alternative energy sources

Ju. V. KURIS. METANOGENEZ AND FLOWSHEETS OF RECEIPT OF BIOGAS

In the article the process of anaerobic transformation of organichesikh matters is described at metagenesis and the flowsheets of receipt of biogas are rotined.....41

I. M. FEDOTKIN. ENERGY, ENVIRONMENTAL AND NUTRITIONAL CONCEPTS

Give people a gratuitous fuel free energy and free food photo biogenesis microalgae that eliminates the current and future disease - a problem the process of science.....49

Energyaudit

I. A. NEMIROVSKY. ENERGYAUDIT IN BUDGETARY ORGANIZATIONS AND ZHKKH

The questions of legislation and problemyv area of energyaudit of dwellings buildings are considered In the article, the analysis of teplopoter' in model dwellings buildings and estimation of potential of possible economy is presented due to the decline of teplopoter' during termomodernizacii of non-load-bearing constructions.....62

Scientific and technical progress and efficiency of production

O. KOZAK, N. G. KOSULINA, A. N. MOROZ. ANALYSIS METHODS FOR DESTRUCTION OF BIOLOGICAL PEST ROOT SYSTEM OF SEEDLINGS OF FRUIT TREES

Considered pest of fruit trees, an analysis of their strengths and weaknesses and identified a promising method of using microwave radiation..... 68

I. V. BOROHOV. ANALYSIS OF THE PARAMETERS OF SYNTHESIZER WITH ADAPTIVE COMPENSATOR BY INGREDIENTS OUTPUT SIGNAL SPECTRUM

Grounded synthesis of quasi-optimal algorithm for solving the problem of adaptive compensation frequency synthesizer, as the causative agent OTDR system..... 73
