### **MODELING THE INFLUENCE OF ECONOMIC SYSTEM ON CUSTOMS REGULATIONS ECONOMIC SECURITY: SCHEMATIC DIAGRAM AND SELECTION OF INDICATORS**

**Introduction:** Intensification of foreign activity of domestic enterprises causes the necessity of modeling their interaction with the subjects of custom regulation, because of such modeling allows not only to define existing situation, but construct scenarios of changing of existing situation and the reaction of every participant about it. **Aim:** the aim of research is defined as the development of principal scheme of building the model of impact of customs regulation subjects on system of enterprise economical security and choice the optimal number of indicators in such model to satisfy the existing needs about the functioning of enterprise economical security system. **Methods:** analysis, synthesis, grouping, graphical and tabular methods, logical and comparative analysis. **Results:** to get the proposed aims the principal scheme of building the model of interaction of customs regulation subjects and enterprises is proposed. The list of main indicators to build such model is proposed. **Conclusions:** considering the significant divergence of interests in the process of interaction between the enterprises and customs regulation subjects it is possible to state about the existence of preconditions that cause the mismatch between the real and based on the built model calculated strategies. Therefore it is necessary to improve the processes of interaction by choosing for both gamers the optimal strategies that are based on the solution of game in the model.

**Keywords:** model, economic security, indicator, subjects of customs regulations.
