

# CONTENTS

## Mathematical Modeling and Computation Methods

PALAGIN A.V. Ontology Conception of Transdisciplinary Scientific Research . . . . .	3
FEYZIYEV F.G., MEKHTIYEVA M.R., SAMEDOVA Z.A. Modification of Peterson-Gorenstein-Zierler Method, Bringing the Matrix to Triangular Form (Binary Case) . . . . .	11
KIENLE A., PALIS S., MANGOLD M., DÜRR R. Modeling and Simulation of Particulate Processes . . . . .	23
GLUKHOV A.D. Quasi-Random Graphs and Structural Stability of Complex Discrete Systems	35

## Informational Technologies

PETRENKO A.A., PETRENKO A.I. The Semantic Model-Driven Service Systems Architecture Modeling Based on Domain Ontologies . . . . .	43
---	----

## Computational Processes and Systems

BELIK V.K. The use of Nanoelectromechanical Systems to Create Some Information Models and Specialized Computing Devices . . . . .	61
---	----

## Application of Modeling Methods and Facilities

SHVAYKA A.I. Load Balancing in IoT Applications Using Consistent Hashing . . . . .	75
MAKSIMOV S.Yu., PRILIPKO E.O., RYBALKIN E.O. Axisymmetric Integrated Distribution Model of the Sinusoidal Welding Current Arc Welding Gap in the Plate . . . . .	85
GULIYEV H.B., RAHMANOV N.R. Probability Load Flow Modeling in the Power System with Distributed Generation and Renewable Energy Sources . . . . .	101
