

CONTENTS

THEORY AND METHODS OF SIGNAL PROCESSING

Vasyliiev O. V., Vasylyev V. V., Simak L. A. <i>S</i> -transform in digital signal processing of fractional dynamics of continuous systems.....	5
Aniskevych L. V., Zakharin F. M. Data fusion algorithm of unmanned ground vehicle	16
Skrypets A. V., Tronko V. D., Slobodyan A. P. Phase difference measurement based on optoelectronic method.....	22
Didyk Z. V., Apostolyuk V. A. Aerodynamic coefficients approximations for arbitrary angles.....	27
Larin V. B., Tunik A. A. Algorithms of Gyro-Free Accelerometer-Based Satellite-Inertial Navigation System.....	32
Asanov M. M., Rogozhin V. A., Skrypets A. V., Tronko V. D. Estimation of accuracy characteristics based on photopolarimetric method	46
Askerov Sh. I. Kalman filtering in orientation systems.....	51

AUTOMATIC CONTROL SYSTEMS

Chikovani V. V. Influence of shock on the vibration amplitude stabilization system of coriolis vibratory gyroscope resonator.....	56
Avnish P. S. Chauhan, Lyshevski S. E. Non-linear dynamics of advanced airframe aircraft based on state-transformation method.....	64
Sineglazov V. M., Tkachov R. Yu. Estimation of remote unmanned air vehicles control delays.....	75
Sineglazov V. M., Podolsky V. P. Software development of aviation bench tests.....	80

COMPUTER-AIDED DESIGN SYSTEMS

Sineglazov V. M., Zakharin F. M. Peculiarities of future air navigation system based on inertial navigation systems/ global positioning system.....	84
Sineglazov V. M., Filyashkin M. K., Zakharin F. M. Estimation algorithm of computer-integrated navigation complex of unmanned aerial vehicles.....	91
Trevor C. Smith, Lyshevski S. E. Design of sustainable power systems with high-power density electronics.....	98

TRANSPORT SYSTEMS

Grishin V. A. Cascade plant of steady and regulated frequency of rotation.....	109
Tupitsyn M. F., Yurchenko A. S. Recommendations for operator trainings of unmanned aerial vehicle.....	118

MATHEMATICAL MODELING OF PROCESSES AND SYSTEMS

Sokolov G. Ye. A procedure of building a computer model of an optoelectronic measuring system.....	123
--	-----

Sushchenko O. A., Tunik A. A. Algorithms of robust optimization of inertially stabilized platforms.....	130
Shcherbina O. A., Litvinenko V. A. Investigation of planar antenna by using the FEKO.....	138
Mukhina M. P., Stoyan T. M. Analysis of magnetometer components errors for correlation-extreme navigation.....	142
Klipa A. M. Algorithm of state space identification of aircraft model.....	149
Apostolyuk V. A., Chikovani V. V. Temperature error model in coriolis vibratory gyroscopes.....	155
Ryzhkov L. M., Stepurenko D. I. Use of least square criterion in TRIAD algorithm.....	159
