Avtushenko I. ., Candidate of historical sciences, docent, docent of department of theory and history of the state and law, National Transport University (Ukraine, Kyiv), irena_avtushenko@ukr.net

Sanatoria and health resorts treatment as an important health care component of the Armed Forces of Ukraine servicemen

The problem of forming and developing the sanatoria and health resorts system for servicemen and members of their families in Ukraine is analyzed using the analytical, problem–chronological, historical and comparative methods. The activity of military sanatoriums from their establishment in 1920 to this day is presented. The attention is focused on the contemporary state of financing and the development of Ministry of Defence of Ukraine sanatoriums equipment and the sanatoria treatment of

the Armed Forces of Ukraine servicemen, which is an important component of medical care.

The aim of the study is to analyze the process of formation and development of sanatoria and health resorts system and to determine its role in the medical support of the Armed Forces of Ukraine servicemen and members of their families. It was proved that military service is a specific socially dangerous area of human activity. The state health care of this category of citizens is required because of the specificity of a military service. The activity of military sanatoriums enables to achieve high efficiency in maintaining and restoring health of Ukrainian servicemen and members of their families, military veterans and the invalids.

Keywords: sanatoria and health resorts treatment, Ministry of Defence of Ukraine, servicemen, Armed Forces of Ukraine, health care.
