Communication in the Information Age

The communication is a process of the co-operation of the subjects, during flowing of which, they has given share information's by means of the sign facilities. Communicative co-operation based on certain the cultural models, the thesauruses, which determine semantic basis of the communication, and the cultural scenarios and the programs, which form the pragmatic aspects of communication. The system aggregate of all semantic and pragmatic elements of communication creates communicative space of society, a basic function of which is forming of intersubjectivity of intentionality consciousness, which answers the cultural forms of concrete society. The mass communication and the virtual culture define the information specific of Information Age. On this basis, the intersubjectivity of contemporary humanity is forming on crossing of the compatible imperatives and the emotional maxims of communicative co-operation.

Keywords: communication, information, model, thesaurus, culture.
