Laws, regulations and values of electoral process public monitoring: the European guidelines

The aim of the paper is characteristic of electoral process public monitoring in Ukraine according to the orientation to European values and compliance with national and international regulations concerning elections. For many years Europeans have believed that democracy is the best regime for any country regardless of economical, political, social or any other processes. And the first (and the most important) characteristic of the democracy is the elections.

Analysis and synthesis of democratic standards in the conduct of elections at national and international levels indicate that the purpose of election process public monitoring in Ukraine has become not only to comply with existing rules of elections, but also to develop proposals for improving the regulatory framework relating to the electoral process for future dissemination and strengthening European democratic values.

Keywords: Democracy values, standards, electoral process, human rights and freedoms, public monitoring.
