

Зміст

<i>Tuncay Aktosun and Ricardo Weder.</i> Inverse Scattering on the Half Line for the Matrix Schrödinger Equation	237
<i>Pavel Exner and Andrii Khrabustovskyi.</i> Gap Control by Singular Schrödinger Operators in a Periodically Structured Metamaterial	270
<i>Vadim Gorin and Sasha Sodin.</i> The KPZ Equation and Moments of Random Matrices	286
<i>Shinichi Kotani.</i> Construction of KdV Flow I. τ -Function via Weyl Function	297
<i>Hermann König and Vitali Milman.</i> The Extended Leibniz Rule and Related Equations in the Space of Rapidly Decreasing Functions	336
<i>L. Pastur and M. Shcherbina.</i> Szegő-Type Theorems for One-Dimensional Schrödinger Operator with Random Potential (Smooth Case)	362
