

C O N T E N T S

<i>Christina Babenko and Roman Chapko</i>	
On the combination of singular and hypersingular boundary integral equations for the Neumann boundary value problem for an elliptic equation with variable coefficients .....	1
<i>Olena Bulatsyk, Ihor Tupyshak and Yuriy Topolyuk</i>	
Rigorous vanishing solutions of a nonlinear hammerstein integral equation related to problems with free phase .....	11
<i>Ivan Dyyak, Yarema Savula and Andriy Styahar</i>	
Numerical investigation of a plain strain state for a body with thin cover using domain decomposition .....	23
<i>Lyubomyr Gnativ, Marta Król and Myroslav Kutniv</i>	
Exact three-point difference scheme for second order nonlinear ordinary differential equations with boundary conditions of the third kind .....	34
<i>Vitaliy Horlatch, Ira Klymenko and Georgiy Shynkarenko</i>	
Formulation and well-posedness of the variational problem of viscous heat-conducting fluid acoustics .....	53
<i>Ganna Myleiko and Sergei Solodky</i>	
Balancing principle for iterated Tikhonov method of severely ill-posed problems .....	72
<i>Davood Rostamy and Fatemeh Zabihi</i>	
Streamline Diffusion Schemes for solving a nonlinear hyperbolic boundary value problem .....	89
<i>Stepan Shakhno and Halina Yarmola</i>	
Two-step method for solving nonlinear equations with nondifferentiable operator .....	105
<i>Kosnazar Sharipov</i>	
On the recovery of continuous functions of two variables from noisy Fourier coefficients .....	116
<i>Sergei Solodky and Evgeny Volynets</i>	
On accuracy of solving semidiscrete ill-posed problems in Sobolev spaces with $\nu$ -methods .....	125

---

*Yuriy Sybil*

The mixed Dirichlet-Neumann problem for the elliptic equations of the second order in domain with thin inclusion ..... 133

*Vitaliy Vasylyk*

Nonlocal problem for an evolution first order equation in Banach space .. 139
