<i>Mykhaylo Andriychuk and Mykola Voytovych</i>	
Modified Newton method for antenna power synthesis problem with fixed norm of the pattern .....	3
<i>George Baravdish and B. Tomas Johansson</i>	
The alternating method applied to two-point boundary value problems ..	11
<i>Roman Chapko and Dmytro Laba</i>	
An alternating boundary integral based method for a Cauchy problem for Klein-Gordon equation .....	30
<i>Marta Król and Myroslav Kutniv</i>	
Three-point difference schemes of high-order accuracy for second-order nonlinear ordinary differential equations with boundary conditions of third kind .....	43
<i>Volodymyr Makarov and Igor Demkiv</i>	
Interpolating functional polynomial for the approximate solution of the boundary value problem .....	63
<i>Volodymyr Makarov, Nataliia Romaniuk and Igor Lazurchak</i>	
FD-method for solving the Sturm–Liouville problem with potential that is the derivative of a function of bounded variation .....	68
<i>Oleg Matysik</i>	
Implicit iteration method of solving linear equations with approximating right-hand member and approximately specified operator .....	89
<i>Yuriy Muzychuk</i>	
On the boundary integral equation method for exterior boundary value problems for infinite systems of elliptic equations of special kind .....	96
<i>Anastasiya Nedashkowska</i>	
Matrix continued fractions for solving the polynomial matrix equations ..	113
<i>Bohdan Podlevskiy and Oksana Yaroshko</i>	
A gradient method of solving inverse eigenvalue problem .....	121
<i>Stepan Shakhno and Halyna Yarmola</i>	
Two-step combined method for solving nonlinear operator equations .....	130

---

*Andriy Styahar*

Numerical analysis of the Girkmann problem with FEM/BEM coupling  
using domain decomposition ..... 141

*Petro Venherskyi and Valerii Trushevskyi*

Numerical modelling of shallow-water flow in hydrodynamic  
approximations ..... 152

*Olena Bulatsyk*

Extension of a class nonlinear Hammerstein integral equation with  
solutions represented by complex polynomials ..... 167
