

## CONTENTS

### **Theory**

- L.N. Vikhor, P.V. Gorskiy.* Heat and charge transport at  
“thermoelectric material-metal” boundary 5
- Alim Ormeci and Yuri Grin.* Coexistence of ionic and covalent atomic interactions  
(bonding inhomogeneity) and thermoelectric properties of intermetallic  
clathrates 16

### **Material Research**

- G.P.Gaidar, P.I.Baranskii.* Some peculiarities of thermopower anisotropy in  
undeformed and elastically deformed  $n - Si$  and  $n - Ge$  single crystals 33
- V.A.Romaka, P.F.Rogl, L.P.Romaka, V.Ya.Krayovskyy, Yu.V.Stadnyk, D.Kaczorowski,*  
*A.M.Horyn.* Research on the features of conduction mechanisms in  
 $Hf_{1-x}Tm_xNiSn$  thermoelectric material 42

### **Design**

- L.I. Anatyshuk, A.V. Prybyla.* Optimization of power supply system of thermoelectric  
liquid-liquid heat pump 51
- R. R. Kobylansky, I. A. Moskalyk.* Computer simulation of local thermal  
effect on biological tissue 57
- T.A.Ismailov, O.V.Yevdulov, D.V.Yevdulov.* Results of theoretical research  
on cooling system for radio electronic equipment elements  
working in the intermittent heat release mode 66

### **Thermoelectric products**

- G. Gromov, S. Glyazer, Y. Zakhartsev.* Thermoelectric heat flux sensors 78
