

## CONTENTS

Theoretical evaluation of the temperature field distribution in the silicon periodic nanostructures during thermal annealing ( <i>in English</i> ) <i>Havryliuk O.O., Semchuk O.Yu.</i> .....	3
Influence of thermolysis in the nitrogen medium on physicochemical properties of medical using material based on biogenic hydroxyapatite ( <i>in English</i> ) <i>Otychenko O.M., Babutina T.E., Parkhomey O.R., Budylyna O.M., Protsenko L.S., Uvarova I.V.</i> .....	10
Light emitting “polymer-nanoparticles” coatings on macroporous silicon substrates ( <i>in English</i> ) <i>Karachevtseva L.A., Kartel M.T., Konin K.P., Lytvynenko O.O., Onyshchenko V.F., Wang Bo</i> .....	18
Removal of uranyl cations from iron-containing solutions using composite sorbents based on polymer matrix ( <i>in English</i> ) <i>Perlova O.V., Dzyazko Yu.S., Perlova N.O., Sazonova V.F., Halutska I.Yu.</i> .....	30
Adsorption of anionic dyes on corn stalks modified by polyaniline: kinetics and thermodynamic studies ( <i>in English</i> ) <i>Soldatkina L.M., Zavrishko M.A.</i> .....	44
Synthesis, optical and photocatalytic properties of mesoporous iron doped titania films ( <i>in English</i> ) <i>Chorna N.A., Linnik O.P., Smirnova N.P.</i> .....	56
Effect of microstructure of modified diatomite on its adsorption properties ( <i>in English</i> ) <i>Datsko T.Ia., Zelentsov V.I.</i> .....	65
Synthesis of catalytic cobalt-containing coatings on alloy AL25 surface by plasma electrolytic oxidation ( <i>in English</i> ) <i>Ved` M.V., Karakurkchi A.V., Sakhnenko N.D., Gorohivskiy A.S.</i> .....	73
Complex standardization of silica–multiherbal nanodispersed Phytosil preparations ( <i>in English</i> ) <i>Lipkovska N.O., Barvinchenko V.M., Kartel M.T.</i> .....	80
AFM surface analysis of Fe-Co-Mo electrolytic coatings ( <i>in English</i> ) <i>Yermolenko I.Yu., Ved` M.V., Sakhnenko N.D., Zubanova S.I., Tychyna O.N.</i> .....	91
Room-temperature NH <sub>3</sub> gas sensors based on heterostructures PbS/CdS <i>Prokopenko S.L., Gunja G.M., Makhno S.M., Gorbyk P.P.</i> .....	98
