

Metallurgical and Mining[©] Industry

№ 8

2016

FOUNDER: "Ukrmetallurginform "Scientific and Technical Agency", Ltd.

Table of Contents

Coke and by-product process

Oleksii Kutniashenko, Vadym Smoliaga, Tetiana Litvinova

Increase of recycling efficiency of domestic waste of preliminary preparation of their dispersed fraction.....6

Corrosion protection of metals

Nadezhda Medyanik, Irina Shadrunkova, Lyudmila Kolyada, Elena Tarasyuk, Tatiana Chekushina

Investigation of strength and corrosion resistance properties of combined packaging materials for metal products.....14

Ecology

Oleg Taraevskyy

Reliability process of long-term operated gas pipelines in difficult mining and geological conditions.....22

Economy

Valentina Molokanova, Vitaliy Petrenko

Project-oriented approach to metallurgical enterprises sustainable development management.....28

Engineer pedagogics

Olena Bondarevska

Significance of teaching organization of humanitarian disciplines in technical higher education institution in the context of individual strategies formation of the students' independent-cognitive activity.....36

Svitlana Hryshchenko, Vladimir Morkun

Formation of ecological competence of future engineers of mining profile on the basis of geoinformation technologies.....40

Machine building

Dmitriy Dmitriyev, Mykola Valigura

Effective bench for scientific researches of the brake systems of a railway freight rolling stock.....44

Grigor'eva V.G., Batareev V.V., Shayda R.P., Pelykh I.V.

The force analysis of interaction of furnace charge layer with working body of vibration feeder for sintering machine charging.....48

Mining production

Vitaly Komashchenko, Vladimir Morkun

Estimation of soils pollution and model of catastrophic chemicalization.....54

Ihor Kovalenko, Nikolay Stupnik, Mikhail Korolenko, Dmitriy Kiyaschenko, Alexandr Batareev
Cartridged and granulated explosive substances of grade Ukrainit for underground mines.....58

Thermal technology

Oleksandr Nuianzin, Sergiy Pozdeyev, Vitaliy Nuianzin
Research of adequacy of mathematical model of heat-mass exchange in the furnace for fire resistance tests of bearing walls.....66
