

Metallurgical and Mining[©] Industry

№ 1

2017

FOUNDER: "Ukrmetallurginform "Scientific and Technical Agency", Ltd.

Table of Contents

Ecology

Maria Stefunko, Vera Zhilina, Irina Shadrunkova, Tatiana Chekushina

Cadmium in the anthropogenic load on the biota.....8

Economy

Molokanova V.M., Petrenko V.O.

Organization development project management in the system of synergetic knowledge.....14

Engineering science

Aleksandr Uchitel, Natalia Dats

Increase in productivity of sintering machine and sinter quality by improvement of ore preparation for sintering.....22

Machine building

Vjacheslav Kovalenko

Structural and functional analysis of tank containers.....26

Fomin O.V., Osmak V.E., Valigura M.Ja.

Tests to determine the automatic braking systems characteristics of gondola cars of domestic production.....32

Stetsko A.A.

Development of classification for bearing system prestressed structures.....40

Olena Slavinska, Vyacheslav Savenko, Olena Usichenko, Alina Kvatadze

The method of accounting infiltration of atmospheric precipitation to calculate drainage facilities.....46

Metallurgy and heat treatment of metals

Parusov E. V., Sahura L. V., Gubenko S. I., Sychkov A. B.

Increasing the strength class of rolled steel made of high-carbon steel in the stream of continuous wire mill.....54

Movchan A.V., Bachurin A.P., Chernoiivanenko E.A.

Transformations with liquid phase presence in sintering of powder high-speed steel.....58

Mining production

Alexander Vorobey, Vladimir Demin, Rustam Khodzhaev, Tatiana Demina

Research of segregation zones of marginal rocks for prediction the rigidity of rocks roof and sides of mine workings.....66

Ekaterina Zavarukhina, Irina Shadrunkova, Natalia Orekhova, Tatiana Chekushina

Action selectivity of consecutive use of collectors during flotation of copper-zinc ore.....72

Pipe and tube production

Henryk Dyja, Vladimir Grigorenko, Oleksii Mishchenko

Development of forecasting method of change of transverse variation in wall thickness in case of cold rolling of pipes made of titanium alloys.....80
