CONTENTS

1 Ye. Ya. Chaplya, B. I. Hayvas, A. R. Torskyy
Construction of the solution of the thermal-convective drying problem for porous solids in drying plants

16 N. V. Charkovska, R. A. Bun, Z. Nahorski, J. Horabik
Modelling GHG emissions in the mineral products industry in Poland: An uncertainty analysis

27 V. V. Dyachok, O. V. Gaiduchok
The construction of ecological and economical production function for energy dependent economics

33 B. V. Gera, V. A. Dmytruk
Obtaining and investigation of the conditions of heat transfer through inhomogeneous inclusion with heat sources

48 O. V. Konstantinov, O. S. Limarchenko, K. O. Semenovich
Effect of combine motion on variation of resonance properties in liquid sloshing problems

58 V. Lytvynenko, A. Smolarz, W. Wójcik, J. Ballester, O. Kozhukhovskaya, K. Gromaszek
Optical combustion sensor data interpretation using hybrid negative selection algorithm with artifcial immune networks

71 V. A. Mashkov, O. A. Mashkov
Interpretation of diagnosis problem of system level self-diagnosis

77 Yu. Povstenko
Thermal stresses in a long cylinder under Gaussian-distributed heating in the framework of fractional thermoelasticity

88 Ya. D. P'yanylo, H. M. P'yanylo, M. Ye. Vasiunyk
Application of orthogonal polynomials for analysis of input numerical data in the problems of mass transfer

99 M. Solodyak
Investigation of magnetomechanothermodiffusive processes in ferromagnetic body at given diffusing substance concentration on the surface

107 L. M. Zhuravchak, O. S. Kruk
Consideration of the nonlinear behavior of environmental material and a three-dimensional internal heat sources in mathematical modeling of heat conduction
