

CONTENTS

- 115 Bezverkhyi O. I., Zinchuk L. P., Karlash V. L.**
Modeling of the piezoceramic resonator electric loading conditions based on experimental data
- 128 Chekurin V. F., Postolaki L. I.**
A variational method of homogeneous solutions for axisymmetric elasticity problems for cylinder
- 140 Gachkevich M. G., Gachkevich O. R., Torskyi A. R., Dmytruk V. A.**
Mathematical models and methods of optimization of technological heating regimes of the piecewise homogeneous glass shell. State-of-the-art investigations
- 154 Kostrobij P. P., Grygorchak I. I., Ivaschyshyn F. O., Markovych B. M., Viznovych O. V., Tokarchuk M. V.**
Mathematical modeling of subdiffusion impedance in multilayer nanostructures
- 160 Kushnir R. M., Popovych V. S., Rakocha I. I.**
Mathematical modelling, determination and analysis of the thermostressed state in a thermosensitive three-layer hollow cylinder subjected to the convective-radiative heating
- 176 Lukiyanets B. A., Matulka D. V.**
Effect of magnetic field on quantum capacitance of the nanoobject
- 183 Nahirnyj T. S., Tchervinka K. A.**
Wave processes in the locally nonhomogeneous solids
- 191 Stasyuk I. V., Velychko O. V.**
Electron spectrum of intercalated stage ordered layered structures: Periodic Anderson model approach
