

CONTENTS

- 111 Boyko N.**
Application of mathematical models for improvement of "cloud" data processes organization
- 120 Chekurin V., Pavlova A.**
Mathematical modeling of elastic disturbance propagation in a structure containing a porous layer saturated with gas and water
- 135 Gera B., Sitarz M., Bolzhelarskyi Ya.**
Longitudinal vibrations of viscoelastic longitudinally nonuniform rod under power load distributed along its length
- 146 Kostrobij P., Ryzha I.**
Modeling of carbon monoxide oxidation process on the two-dimensional catalyst surface
- 163 Kostrobij P., Markovych B., Viznovych O., Tokarchuk M.**
Generalized electrodiffusion equation with fractality of space-time
- 173 Lukiyanets B., Matulka D.**
Quantum mechanical effects in the Coulomb interaction of electrons which are localized in opposite double electron layers
- 177 Markovych B., Zadvorniak I.**
An effective interionic interaction in semi-infinite metal in the presence of external electrostatic field with taking into account the local field approximation
- 183 Prytula N., Pyanylo Ya., Prytula M.**
Optimization of unsteady operating modes of gas mains
- 191 Prytula Z.**
Amplitude equations for activator-inhibitor system with superdiffusion
- 199 Pyanylo Ya., Sobko V.**
Pipeline pressure distribution finding methods
- 208 Pyanylo Ya., Vavrychuk P.**
Calculation of the underground gas store functioning parameters in the water drive mode for maintenance of gas extraction process
