

ODESSA ASTRONOMICAL PUBLICATIONS

Volume 6 (1992/1993)

CONTENTS

Preface	3
V.G.Karetnikov Relations between the absolute characteristics of the components of the different-type eclipsing binary systems	5
E.V.Menchenkova V 367 Cygni	9
L.V.Glazunova, G.V.Manilova Spectral and polarimetric study of close binary systems XZ Cep and V 448 Cyg with a composite spectrum	17
I.L.Andronov Determination of the orientation of the accretion columns in magnetic cataclysmic variables	21
S.M.Andrievskij, G.A.Garbuzov The shock wave heating mechanism of pulsating star chromospheres	31
S.N.Udovichenko, Yu.S.Romanov, M.S.Frolov On the magnetic variability of pulsating stars.	33
T.V.Mishenina, N.S.Komarov, L.E.Kantsen Chemical composition of the atmospheres of three giants in Hyades	37
E.N.Kramer, I.S.Shestaka The formation and dissipation of a meteor coma	41
E.N.Kramer, I.S.Shestaka, Yu.M.Gorbanev Evolutionary tracks of short-periodic meteor swarms	45
I.S.Shestaka Do genetically related comet pairs and groups exist?	53
Yu.I.Zaginailo Determination of the second twilight brightnesses by the method of the twilight probing of the earth's atmosphere	59
M.Yu.Volyanskaya Right ascensions of 200 double stars	63
