

CONTENTS

<i>Karetnikov V. G.</i>	
Foreword	2
Contents	3
The conference «Chemical and dynamic evolution of stars and galaxies»	
<i>Andrievsky S. M.</i>	
Galactic abundance gradient	4
<i>Bisnovatyi-Kogan G. S.</i>	
Atoms in magnetic fealds: possible origin of chemical anomalies in magnetic stars	11
<i>Chernyshova I. V.</i>	
Chemical abundances and evolutionary status of some LB type stars and FBSwl	16
<i>Khan S. A., Shulyak D. V.</i>	
Model atmosphere of HD101065 with individualized abundances	18
<i>Komarov N. S.</i>	
Evolution from the nuclides to the chemical elements	23
<i>Leushin V. V.</i>	
Evolution of chemical structure extreme He-rich stars	37
<i>Lyubimkov L. S.</i>	
On the Crimea-Texas project “Surface abundances of light elements for a large sample of early B-type stars”	47
<i>Marsakov V.A., Borkova T.V.</i>	
Subsystems of the Galactic halo, their structures and compositions	52
<i>Merezhin V. P.</i>	
Correction of the scale of astrophysical quantities	61
<i>Mishenina T. V.</i>	
Element abundances in stars: connection with chemical evolution of a Galaxy ..	71
<i>Pavlenko Ya. V.</i>	
Infrered spectra of cool stars – nature and models (Review)	88
<i>Shavrina A. V., Polosukhina N. S., Tsymbal V. V., Pavlenko Ya. V., Yushchenko A. V., Gopka V. F., Veles A. A.</i>	
Some features of roAp stars spectrum	92
<i>Shustov B. M.</i>	
Galaxies and the intergalactic medium: evolutionary interrelations	97
