**Key words:** choice, didactic choice, educational and cognitive activity.

**S. Gorbulinska**

**Pedagogical Conditions of Genetics Knowledge Formation in Senior Profile Secondary School Students**

The article is devoted to the causes based on pedagogical conditions of genetic knowledge effective formation in the secondary school, the use of modern innovative technologies focused on the personality and individuality of senior students, active learning methods that promote active intellectual and practical activities in the knowledge formation process. Integrated approach to training and education is provided by interdisciplinary relations that reflect the interconnection of separate subjects material.

**Key words:** knowledge, pedagogical conditions, active methods, genetics.

**I. Demchenko**

**Pedagogical Conditions of Younger Pupils Creative Development in Secondary Inclusive Range**

In the article the pedagogical conditions of creative development of primary schoolchildren in inclusive range of elementary school is grounded. The role of Arts in activization of creative activity of schoolchildren with different levels of development is shown. The author researches the ways of creative activity of primary schoolchildren in inclusive educational process on lessons of Arts.

**Key words:** inclusive education, range of elementary school, creative development, pedagogical conditions, primary schoolchildren, lesson of Arts.

**L. Karnaukh**

**Ethnic Peculiarities of Tolerant Relations Forming Between Pre-School Children in the Context of Gender Socialization Process**

The article is dedicated to the study of theoretical and conceptual aspects of ethnic peculiarities of tolerant relations forming between pre-school children in the context of gender socialization process. The content and essence of the concepts of «gender socialization» and «tolerant relations» were analyzed. Statement that gender socialization is a main social process through which integration between a personality and society by means of tolerant intersex relations was defined.

**Key words:** tolerant relations, gender socialization, tolerance, pre-school children.

**O. Pyshko**

**Homework in Science of Law in the 9th Grade: Peculiarities And Specificity of Its Choice And Implementation**

The article deals with the general features of homework in the educational process. The peculiarities and specificity of the choice and doing homework of the science of law practical course, any sort of its content, practical orientation, the specificity of students learning activity organization are revealed. As a special type of homework for the students of the 9th grade there are described the tasks involving the interaction of students with their parents. The statements provided in the paper are illustrated by the examples and arguments based on a generalization of experience of teaching law at the school.

**Key words:** home educational activity, homework, law practical course, homework peculiarities.

**I. Postolenko**

**Distance Learning of Foreign Languages: Integration Aspects**

The question of the integration of foreign languages distance learning in higher education is presented in the article. We investigated the integration aspect of distance learning. Principles, methods, forms and means of distance learning are defined. We analyzed the effective way to conclude curriculum for distance learning of foreign languages. We characterized the basic methodological principles, theories and pedagogical approaches of teaching foreign languages. Detailed analysis of three theories of interaction when learning foreign languages is given: student – content interaction; student – instructor interaction; student – student interaction.

**Key words:** distance learning, interaction theory, the theory of interactive learning of foreign languages, asynchronous interaction, and communicative competence.

**L. Ryabovol**

**Monitoring of Student Achievements in Science of Law: Concepts, Principles, Functions, Purpose, Subjects, Objects, Criteria For Evaluation**

This paper considers control as an integral part of training that allows to compare achieved and desired results. It was established that the control system is the formation of structure which has covered the interrelated components such as verification (including surveillance), evaluation, assessment records. Such principles as theoretical core control, its functions, purpose, subjects (teachers and students), the objects, analyzed criteria for assessment of student achievements in law have been defined.

**Key words:** control, control principles, control functions, the criteria for assessment of student achievements in law.

**Ya. Fabrychna**

**Subject Content of Future Foreign Languages Teachers Training For Professionally Oriented Written Bilateral Translation**

The article presents the results of the subject content's selection of future foreign languages teachers training for written bilateral translation. Focusing on the study of the problem of subject content selection of professionally oriented foreign language teaching and written translation, the author defines the subject contents which is presented in aggregate communicative and thematic minimums. Communicative minimum includes sphere of communication, educational and communicative situations, social roles, subject, communication tasks and communicative intentions in the context of communication in the process of written bilateral translation. A thematic minimum includes complex topics, subtopics and complexes.

**Key words:** subject content, future foreign languages teachers, written bilateral translation, communicative minimum, thematic minimum.

**A. Sherudylo**

**The Level of Future Teachers Readiness For Educational Practice in Summer Camps**

The article defines the concept of readiness for work in summer camps, major components (motivational, cognitive, operational, evaluative) are characterized and describes the qualitative characteristics of formation levels (high, satisfactory, medium, low). The results of studying the level of readiness for the educational practice among the students of Ukrainian higher educational institutions. Educational approaches are revealed that cause the greatest difficulties among the future teachers, such as – the organization of club forms work and career guidance activities.

**Key words:** readiness for work in summer camps, levels of readiness, future teachers, educational practice, summer camps.

**L. Shkarban**

**The Psychological And Pedagogical Analysis of Left-Handedness Problem**

The retrospective analysis of the problem of left-handedness is determined in the article. In The Soviet Union the left-hander pupils studied to write with right hands. We set that today the amount of left-handed pupils was increased. The article analyses the content of the «right-handedness», «left-handedness», «ambidexter», «ambisinistr». The history of development of views to functional asymmetry of brain and the functions of the paracephalons are considered; scientists' hypotheses which explain reasons of origin of different types of hand prevailing are analyzed.

**Key words:** right-handedness, left-handedness, ambidexter, ambisinistr.

**NEW TECHNOLOGIES**

**S. Galushko, G. Gordashevska, L. Galushko**

**The Essence of Innovative Technologies of Teaching And Their Role in Students' Cognitive Activity Promotion**

The article is devoted to the justification of expedience of the use of technologies of teaching in future teachers training, analysis of component elements of technological apparatus, description of dominant teaching technologies of educational process. It is indicated that the realization of effective training of future teachers is possible under the term of introduction of innovative technologies of teaching, which enable to promote the informative content of educational material, provide the use of visual methods, extend the possibilities for independent educational activity of future teachers and activate their thinking, give an opportunity to obtain the integral result of pedagogical activity.

**Key words:** innovation, innovative technology of teaching, training of future teachers.

**L. Dzyuba**

**Studies Levels of Future Elementary School Teachers to Familiarize Students with the Information And Communication Technologies**

Study levels of future teachers to get acquainted with ICT in primary schools allows to determine the best ways of creating a readiness for such a profession. This paper analyzed the definition of readiness in psychological and pedagogical literature, identified the need to study the levels of future primary school teachers to familiarize students with ICT, defined classification levels of preparedness for various indicators, analyzes them and determines guidelines for the experimental results of student teachers.

**Key words:** primary education, a future primary school teacher, exploring ICT readiness, readiness, elementary school students.

**A. Kislaya, A. Koshel**

**Forming of Health Saving Competence in Preschool Children by Means of Health Saving Technologies**

The article discusses the features of health saving competence forming in preschool childhood. Different approaches to health saving competence formation in preschool children have been analyzed. The classification of health saving technology has been suggested. Ways and means of forming health saving technologies have been identified. Implementation of health saving technologies in preschool education has been proposed. Well known classifications of health saving technologies have been analysed.

**Key words:** health saving competence, preschool children, health, technology.

**O. Komar**

**Principles of Future Teachers' Training to the Use of Interactive Technology**

The article reveals the problem of principles of future teachers' training to the use of interactive technology. The author summarizes didactic principles of education process organization at a higher educational establishment; distinguishes some of them as the most important in future teachers' training to the use of interactive technology. Realization of the principles mentioned enables to solve the tasks of future teachers' training to the use of interactive technology consciously and constructively.

**Key words:** principles, future teachers' training, interactive technology.

**V. Oliylyk**

**Formation of Information And Analytical Skills of Future Engineers-Pedagogues with Creative Training Technology**

Article is devoted to relation of critical thinking to information and analytical skills and the role of creative training technologies in the formation of information and analytical skills of future engineers-pedagogies. The author made a significant work to identify approaches to the definition of «critical thinking» by scientists in the area of pedagogical knowledge. Creative techniques and methods of creative problem solving, among which author devotes greater attention to discursive methods of search of solving creative problems, contribute to the development of critical and creative thinking.

**Key words:** informatization, information and analytical skills, critical thinking, creative techniques, creative training technologies.

**L. Protsay**

**Future Psychologists' Training to Develop And Make the Database by Means of OpenOffice and Org Base**

The problem of future psychologists' training to utilize the database management system has been considered. The practical class as the basic form of students' training to utilize databases during psychologist's practice learning by example of office application OpenOffice. Org

Base has been characterized within limits of academic discipline «New information technologies and technical means of training».

**Key words:** lecture, practical class, independent work, database, database management system, office application OpenOffice.

**V. Rejydalo**

### **Modernization of Komenskiy Didactical Principles in the Context of Modern Learning Technologies in Higher School**

The article examines the problems of modern methods of teaching Ukrainian literature in higher education, including the effectiveness of the use of technology in teaching masters by means of the course of «Teaching Ukrainian Literature in High School». The attention is drawn to one of the main objectives of the university – training future teachers of Ukrainian Literature, formation of their professional and methodological competence through the use of modern educational process of learning technologies. It shows the conceptual foundations of technology developing training, including moderation. At the same time, the views of prominent Czech teacher Komenskiy for training system have been highlighted and the possibility of using its didactic principles in practice in teaching moderation lectures in higher education was analyzed.

**Key words:** educational technology, training technology, training developing technology, methods of moderation, moderation lecture, didactic principles of Komenskiy, the principle of clarity, the principle of systematic, future teacher of Ukrainian literature, methodology of teaching Ukrainian literature in higher school.

**M. Shyshkina, U. Kogut, I. Bezverbnyi**

### **Formation of Bachelor of Informatics Professional Competence in the Cloud Based Learning Environment of the Pedagogical University**

This paper outlines the ways of teaching informatics disciplines using the systems of computer mathematics (SCM). The general characteristics of the SCM and conditions considered to be appropriate to use the Maxima as a learning tool for Bachelors of informatics training at the pedagogical university are exposed. The pedagogical conditions of the development of the information-educational environment in the pedagogical university using SCM are revealed. The features of the cloud-based solution for providing access to educational services are examined. The results of the pedagogical experiment are presented.

**Key words:** bachelors of informatics, informatics disciplines, computer mathematics systems, Maxima, cloud technology.

## **THE FORMATION OF PROFESSIONAL COMPETENCE**

**E. Korol, A. Alekseev**

### **Formation of Informatics Competencies in Pedagogical Specialities Students**

The article shows the stages of formation of informatics competencies of students of pedagogical specialities (based on the study of informatics disciplines) comprising informatics training that occurs in the general stream of education. In this regard, the article dwells upon the basic difficulties in the formation of informatics competencies in the general stream of education and introduces possible solutions within the differentiated instruction.

**Key words:** informatics discipline, IT competencies, the total flow of students, differentiated instruction.

**S. Kutsenko**

**Psychological And Pedagogical Conditions of Forming the Creative Potential in Future Teacher of Choreography by Folk-Stage Dance**

The article explores the problem of determining the psychological and pedagogical conditions favorabled for the perfecting of the educational process of student-choreographer, with the purpose of effective forming of creative potential of future teacher of choreography by folk-stage dance. The author has highlighted a number of conditions, including the orientation of educational process for certain educational principles based on the interaction between education, training and development at all stages of training of the future teachers of choreography; faith in yourself and your creative powers; purposefulness as the ability to guide in their actions not as accidental aspiration but firm conviction; freedom in the creative process as a pedagogical engine of creative development.

**Key words:** psychological and pedagogical conditions, creative potential, future teacher of choreography, folk-stage dance, principles of training and education, faith, purposefulness, freedom.

**O. Lazareyv**

**The Formation of the Agrarian Universities Teachers' Rediness to Form Students' Professional Communicative Competence**

Introduction in the higher educational agricultural institutions the system of development the teachers' professional communicative competence has been analyzed in the article. It deals with one of the dominant trends of improving the future specialists' of agricultural profile training. The important role in the study of this problem plays the teacher's personality. The work of teachers of higher agricultural educational institutions aims to organize purposeful work with students towards enriching their vocabulary with the future profession and improvement the professional communicative competence.

**Key words:** future specialists of agricultural profile, professional communicative competence, agrarian teachers, competence approach.

**S. Lutsiv**

**Pedagogical Communication as a Mean of Linguistic Identity Formation**

This article considers the problem of pedagogical communication as a mean of linguistic identity formation. It is shown that pedagogical communication is a multifunctional phenomenon. It is alleged that it ensures the information sharing, empathy, knowledge of the individual, self-assertion, productive organization of the interaction. It reports that pedagogical communication helps teachers manage the interaction as a holistic process at the lesson and outside it.
