Journal publishes the proceeding papers, which were submitted by the participants of the International Conference “**Nanomaterials: Applications & Properties**”. Following the objectives of the Conference, the published articles contain new theoretical and experimental results, which are devoted to actual problems of modern Material Science. Among them: technology of nanomaterial production, properties of bulk and thin film nanomaterials, nanomaterial-based coatings, nanosystems and nanoparticles. The conference is focused on the applications of nanomaterials in Industry, Biology, Medicine, Chemistry and on the methods of the nanomaterials research.
