#### CONCEPT OF THE PEDAGOGICAL DISCUSSION

IN MODERN SCIENTIFIC RESEARCHES.....5

True democratization of education is possible only on a discursive basis, where each participant in the educational process has the opportunity to express his or her own opinion, to defend it during permanent discussions. Therefore, in recent years the special attention of researchers is directed at the study of pedagogical discourse. The main purpose of these studies is, first of all, the linguistic aspect of the subject-subjective interaction of participants in the discourse in view of its interpretation as situational and socially determined speech activity. But diverse discursive practices lead to the need to revise such an understanding of pedagogical discourse and to shift weight in its assessment with a purely linguistic analysis of social factors of communication. This leads to the study of extra-linguistic factors in the development of pedagogical discourse as a linguistic, communicative, situational, personality and status-oriented competence, which is determined by the areas of communication and social institutions established in society.

**Keywords:** person, education, discourse, pedagogical discourse, peculiarities of pedagogical discourse, elements of pedagogical discourse.

DIDACTIC LOGISTICS IN POLITICAL STUDIES AND HIGHER SCHOOL:  
MIND POWER OVER POLITICAL IDEAS ..... 34

The paper presents political studies as science and a discipline in terms of differences of their subject matters provided by two ontological different realities in scientific literature of textbooks, articles, monographs: political phenomena and thoughts, ideas, reflections of political scientists on them, which requires a new didactic education and teaching strategy in the form of didactic logistics as a theory of teaching the art of reflection. By comparison and contrast of two theoretical and methodological and methodical and technological strategies in the form of natural science and logistic paradigm, the author suggests a new educational strategy and a theory of political text analysis in terms of three types of generalization procedures: sign, universal form of content of thought (UFCT) and paradigmatisation. All of these resulted in the definition of political mind that drives political scientists to create new political ideas as to political power, its subject matter and mind power over political ideas.

**Keywords:** political studies, didactic logistics, types of generalization procedures: sign, universal form of content of thought (UFCT) and paradigmatisation, political mind, political power, mind power over political ideas.

CATEGORY OF INFORMATION SECURITY IN NATIONAL  
PHILOSOPHICAL AND POLITICAL DISCOURSE ..... 48

As an important indicator of the protection of citizens, society and state, information security is an integral part of national security. Therefore, its determination mainly focuses on preventing harmful effects that may result in various information threats, as well as eliminating and overcoming those effects with the least possible harm to society and humans. In this aspect, the study of not only the philosophical and phenomenological and socio-psychological determinants of information security of citizens, but also political and legal resources and mechanisms of protection of the information space of the state in the conditions of the functioning of the global information society acquires a special significance. Unfortunately, Ukraine has not yet developed an effective model of system security of information security of the state, society and person, although such a necessity is fixed at the constitutional level. Therefore, it is very important today to develop a holistic codification document that would comprehensively cover various aspects of the formation of state policy in the field of national security, as well as determine the concrete tools for its implementation.

**Key words:** person, information, politics, security, information policy, information threats, information security.

#### INNOVATIVE TYPE OF PROGRESS AS AN OBJECT OF STUDY

OF PHILOSOPHY AND SCIENCE..... 55

The concept of progress has a long history, the origins of which are rooted in the ancient Greek philosophical tradition. However, from ancient times and until now, thoughts about progress are closely linked with the beliefs of philosophers and scholars in the need for innovative development of society. Indeed, innovation is one of the fundamentals of radical transformation in various spheres of social life. Paying attention to these principles, for many centuries philosophers and scholars have been trying to find the determinants of social progress. Their attempts to determine the criteria for progress are sometimes limited to the search for material or spiritual factors as the fundamental determinants of social development. But one can not ignore the fact that social progress is closely related to the progress of scientific and technical type. And this in its turn – with the socio-economic development of humanity, one of the main factors of which is innovative activity.

**Keywords:** innovation, innovative activities, progress, social progress.

#### PERIOD OF CHANGE: EDUCATION PROCESS METHODOLOGY AND METHOD

#### THE ROLE OF MASTERING ENGLISH IN IMPROVING THE QUALITY

OF EDUCATION IN UKRAINE..... 59

The quality of education has been studied in the broad sense of these two words. It is indicated that modern states spend more on the education system than defense. Young people have been studying for many years, and come to the labor market usually after receiving of general high or vocational education. It is noted that at the moment, among the criteria for the quality of education, is the adoption of young people of a foreign language (in Europe, two languages). It is explained the transformation of the English language to the international language №1. The data on the rating of the countries of the world according to the indicator «English language proficiency» («knowledge of English») is given and the poor indicators of Ukraine are noted. There have been given different ways for successful study of the English language by young people.

**Keywords:** education, quality of education, European standards, foreign languages, universal English language, effective teaching.

**FEATURES OF TEACHING FOREIGN LANGUAGE OF HUMANITARIAN SPECIALTY STUDENTS IN HIGHER EDUCATIONAL STAFF OF UKRAINE..... 77**

Learning English is an indispensable attribute of a successful and educated person. In modern institutions of higher education, English is included in most technical and humanitarian programs.

Technical specialties are characterized by the study of specific terms in English, as well as tasks related to the translation of technical documentation. On humanitarian specialties they ask essays on English, various compositions, and also read and discuss literary works in the original language.

The article deals with the concept of «Foreign languages communicative competence», which is the basis for successful professional development of future teachers of humanitarian specialties in higher educational institutions of Ukraine.

**Keywords:** foreign language education, communicative competence, multicultural personality, humanitarian specialties.
