

CONTENTS

AUTOMATION AND INFORMATION-MEASURING EQUIPMENT

Kukharchuk V., Rodinkov V., Koval A. The research of the dynamic modes of work of the system drive of inclined diffusion machine by the simulation modeling.....	7
---	---

CIVIL ENGINEERING

Morhun A., Franchuk O., Dovhopol D. The prediction according to the method of boundary elements inputs of circular pile silos field of grain dryer.....	13
--	----

ECOLOGY AND ECOLOGICAL CYBERNETICS

Bereziuk O., Gorbatiuk S., Bereziuk L. The modeling of dynamic sanitary-bacteriological composition of hard domestic waste during composting in the summer season.....	17
---	----

ECONOMICS AND MANAGEMENT

Dzhedzhula V. Economic efficiency of low-cost actions of energy saving in industrial air conditioning	21
Sinelnik V. Forming of cost of insurance companies in the conditions of development of financial and innovative-investment processes in Ukraine	25
Fedoruk O. The economic security of the state with an open economy: essence and priorities of strengthening.....	31
Rassuzhdai E., Shestakova O. Increase of competitiveness of coal producers on the basis of estimation of their capitalization	38
Yepifanova I. Prospects of increase of management efficiency by innovative activity of domestic enterprises	42
Grabovetskyi B., Zianko V. Identification of the content and ranking of the factors limiting the development of venture business on the basis of Delphi technique	46
Zianko V., Zianko P. Econometric modeling of real interest rate for the USA, China and their comparison between the Ukraine's model	55
Shtovba S., Shtovba O. Identification of the relationship among the corruption and the shadow economy in European countries in 2003—2012 years.....	63
Sainskyi D. Assessment of financial and organizational support of the state support for the development of hop growing in Ukraine	69

ENERGY GENERATION AND ELECTRICAL ENGINEERING

Yakovlieva A., Pavlenko A. Estimated assessment of U-shaped pipe emitter parameters, submitted like contingent (estimated) rectangular radiant energy source	75
Levytskyi S., Bartetskyi A. Mathematical model of diagnosis system of braking circuits of inverter frequency drives	79

INFORMATION TECHNOLOGIES AND COMPUTER SCIENCE

Kvietnyi R., Sofyna O., Buniak Yu. Deblurring filter design using second fundamental form of image surface.....	84
Azarov O., Teplytskyi M. The dynamic characteristics of push-pull direct-current amplifiers with separate channels for signal conversion	89

MECHANICAL ENGINEERING AND TRANSPORT

Samchuk L. Making of filter elements according to the method of self-spreading high temperature synthesis for the regeneration of technical liquids and oils.....	97
Bozhko T. Determination of optimal conditions for high quality finishing process of sintered powder materials	101

RADIOELECTRONICS AND RADIOELECTRONIC EQUIPMENT MANUFACTURING

Filyniuk M., Lazariev O., Lishchynska L. Devices for videoimpulse-immittance logical level convertors	106
Kravtsov I., Kychak V., Kravtsov Yu. The principle of constructing systems of the spatio-temporal filtering	112

STRATEGY, CONTENT AND NEW TECHNOLOGIES OF TRAINING SPECIALISTS AT HIGHER EDUCATION INSTITUTIONS

Mokin B., Mokin O. Increasing adequacy degree of forgetting knowledge process model.....	116
Klochko V., Voiush V. The typical students error during analyzing Excel and the reasons of these errors.....	122
Homiuk I. The use of non-traditional assessment tools of learning outcomes of students in higher mathematics	127
Serdiuk V., Beletska N. The training of highly qualified personnel for the labor of the construction industry	133
Troianovska T. The processing method of CTS subject preparation individual descriptions data.....	140
ABSTRACTS	157
