

CONTENTS

AUTOMATION AND INFORMATION-MEASURING EQUIPMENT

Belzetskyi R., Shyian A. The choice of medical technology for the system of the distance determination of the emotional state of the special divisions' fighters of the Ministry of Internal Affairs	7
---	---

CIVIL ENGINEERING

Serdiuk V., Huchok I. The role of crushed stone products in solving the housing problem	11
Boiko I., Sakharov V., Getun G., Melnyk V. Analysis of influence of seismic load on high-rise building deformations depending on the number of floors	16

ECOLOGY AND ECOLOGICAL CYBERNETICS

Bereziuk O. Mathematical model of prognostication of the efficiency of the waste gas production for the development of strategy, complex of machines and equipment for handling hard domestic wastes	21
Rusakova T., Biliaiev M. CFD modeling of the air pollution circulation in micro districts	25

ECONOMICS AND MANAGEMENT

Grabovetskyi B., Zianko V. Forecasting and analytical support of strategic management decisions in the process of technical innovation creation.....	31
---	----

ENERGY GENERATION AND ELECTRICAL ENGINEERING

Lezhniuk P., Semeniuk N. Modern approaches to calculations of power losses and energy from transit crossflows	39
Avramenko V., Hurcieva T., Yunieieva N. Modification of the dynamic characteristics of the load in the calculation of the power system stability to account the self-starting of induction motors	42
Lezhniuk P., Komar V., Sobchuk D. Estimation of influence of renewable energy sources on providing of balance reliability in electric network.....	45
Kutin V., Shpachuk O. Simulation of current in the reacting organ of protection device from single-phase earth fault of stator winding synchronous generator that operates in a block with a transformer.....	48
Kyryk V., Nagorny R. The process investigation in no-loaded power autotransformer during geomagnetic disturbances	52
Syvokobylenko V., Vasylets S. Mathematical modelling of induction motor with dynamic saturation	55
Govorov F., Govorov V., Korol O., Govorova K. Complex optimization of modes of systems of power supply and illumination of cities	59
Yandulskyi O., Trunina G. Approaches to the optimal control of modes of distribution power networks with distributed generation	62
Ivakina K. Analysis of electromagnetic processes rectifier with pulse-width modulation	65
Artiukh S., Chervonenko I. An optimum efficiency control system for hydroelectric units operating at variable speed	68
Tereshkevych L., Bandura I., Vlado O. Internal symmetrization in knots of joining of lines with monophas loading.....	71
Savenko A. Optimization of the ship's power plant to improve the quality of electricity	74
Kyianiuk O., Ghlad I. Experimental research of energy efficiency of electro-drive pumps of the water supply system of the pool.....	79

Bodunov V., Gai O. Determination of distributed generation power value with island modes.....	82
Shtovba S., Pankevych O., Nagorna A. Criteria for training fuzzy classifier taking into account the cost matrix	84
Kozhemiako V., Malinovskiy V., Tarnovskiy N., Yaroslavskiy Ya. Analytic summary of geoinformation-power networks technologies and methods of their stability increasing.....	91
Lysogor V., Zelinska O. Two-level logic dynamic management model vibration machinery of agricultural purposes.....	98
Bilichenko V., Romaniuk S. The system model of project management of the strategy for the motor transport organization steps in their life cycle	102

STRATEGY, CONTENT AND NEW TECHNOLOGIES OF TRAINING SPECIALISTS AT HIGHER EDUCATION INSTITUTIONS

Kurok V., Shevel B. Historical component of training of the future engineers-teachers	108
Tiutiunnyk O., Mykhalevych V. Usage of the systems of computer mathematics to create software for educational purposes	111
Homik O. Multimedia technologies as a means of future economists' management culture formation.....	117
ABSTRACTS	132
